How to Complete Google Play Certification

Customer Support E-mail: ifly.customer.care@gmail.com

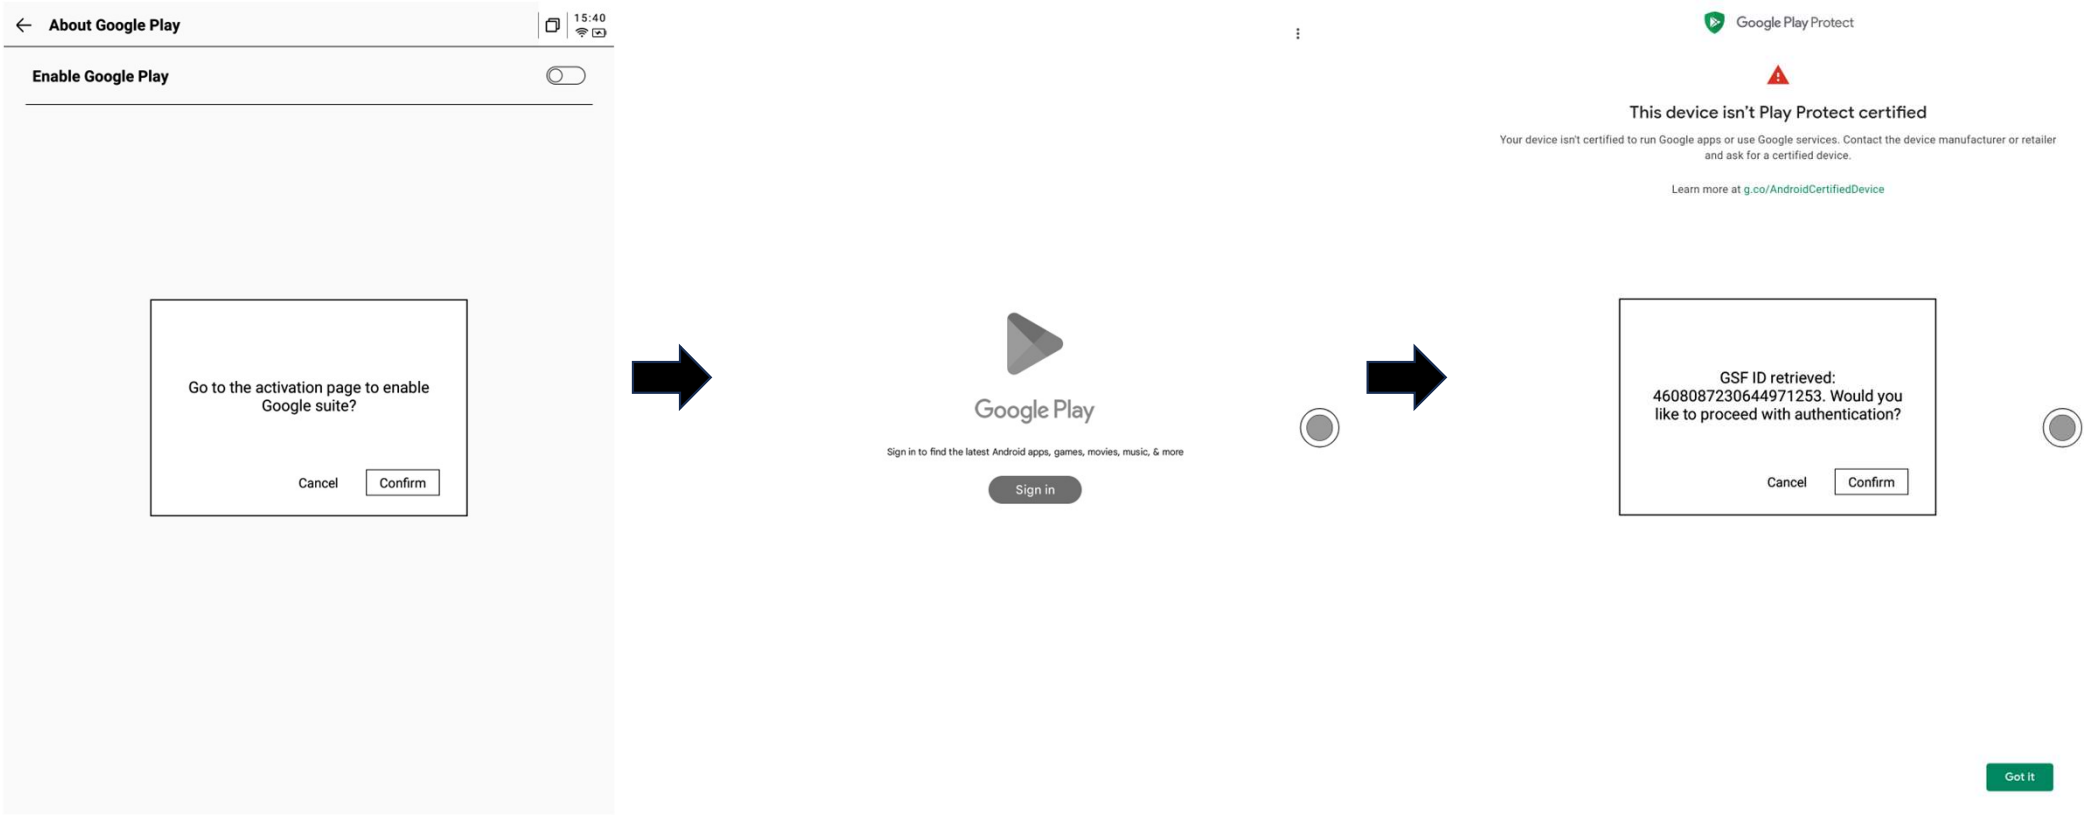

1.Click the **[Application]** button to enter the application interface. In the top right corner of the app interface, click **[About Google Play]**to proceed to the next screen. Here, you can enable Google Play.

PS: After enabling it, the Google Play icon will appear on the app interface. However, since the full setup process hasn't been completed yet, it will not be usable at this stage. So after enabling it, please do not exit the screen—just follow the steps as instructed.

2.After turning on the switch, click the **[Confirm]** button on the pop-up window to proceed with the next steps. At this point, another pop-up will appear to retrieve the GSF ID of your device. Continue by clicking **[Confirm]** again.

PS: You can save your GSF ID here for future reference.

3.Once you reach the account login screen, follow the steps to enter your account and password. After a successful login, you'll be directed to the device registration page, where you'll need to enter your GSF ID and complete the "I'm not a robot" verification.

In most cases, the GSF ID will be filled in automatically. If it is not, you will need to manually enter the ID you retrieved earlier and then complete the verification. Once the verification is successful, the **[About Google Play]** screen will update to the style shown in **Figure 3**.

4.If **Figure 1** appears, it means the process has been completed. Next, restart your AINOTE device, re-enter the App Center, and click on Google Play to log in with your account. If the login is successful, you can start using it normally .If you see a message indicating that Google protection has not been passed, it means the service is not yet available and you'll need to wait for the review process to finish. This can take up to 4–5 days.

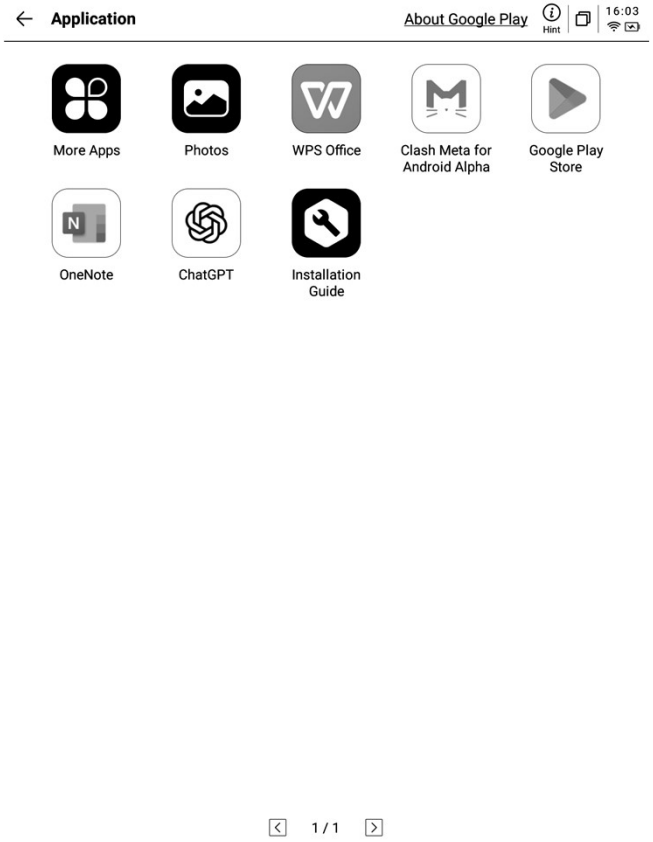

(**PS:** In some cases, simply restarting the device may complete the process.)

Figure 1

You **must** restart the device.

After restarting, click on **Google Play**.
