Steps to initialize SSD in iMac docking station

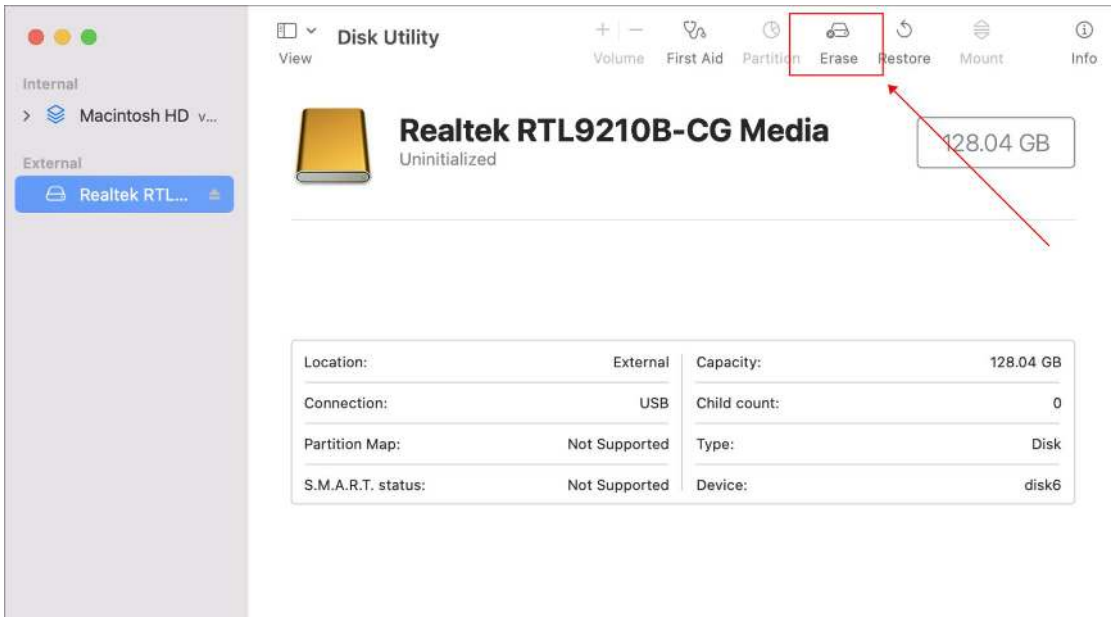

1. Insert the new SSD first, then connect to the computer----the following window will pop up:

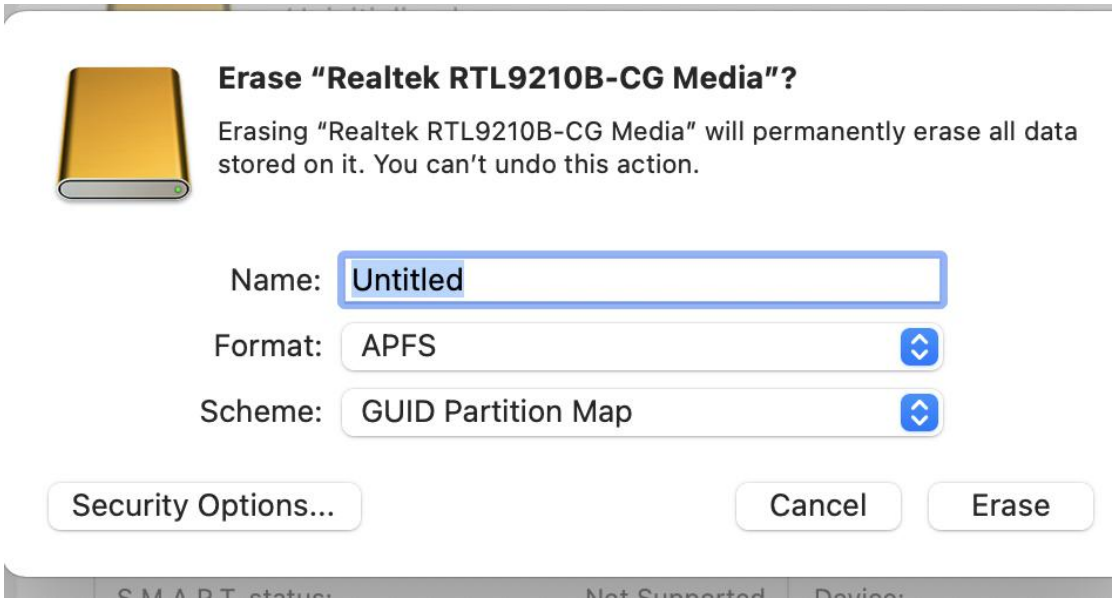

2. Find the "Disk Utility" of your computer：

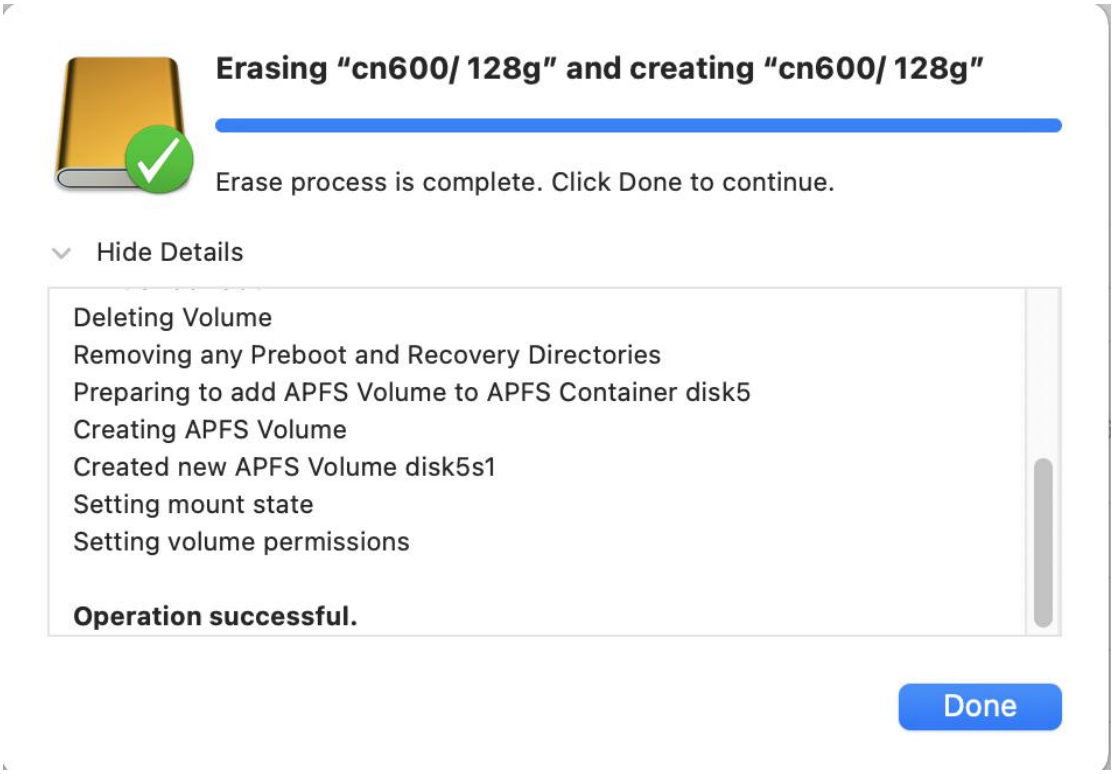

3. Find the newly inserted SSD and click the ""Erase"" button above:

4. After setting the Name, Format, and Scheme you need, click the ""Erase"" button:

Erasing “cn600/ 128g” and creating “cn600/ 128g”
Erase process is complete. Click Done to continue.
