Insert into the car's 12V plug-in socket

TROUBLESHOOTING

PROBLEM NAME	SOLUTION
Inflates Slowly	1. Check whether the battery of the air pump is sufficient. 2. Check whether the air pipe is leaking. 3. Check whether or not both ends of the inflation hose are firmly connected. 4. Check whether the item being inflated is leaking
Not Inflatable	1. Check whether the battery of the air pump is sufficient. 2. Check whether the pressure of the inflated item exceeds the preset pressure.
Not Charging	1. Using the certified adapter and the included charging cable, try charging again.

SPECIFICATION

PRODUCT NAME	PORTABLE TIRE INFLATOR
Operating Temperature	0-45℃
Charging Port	USB-C
Charging Time	3.5 hours

SAFETY INSTRUCTIONS

1. This product is not a toy. Please keep it away from children.

2. There is a lithium battery inside the product. Please do not put the product in fire.

3. For better product performance, allow the pump to cool for 2 minutes after 20 minutes of continuous use.

4. Storing the product for a long time may reduce the energy efficiency of the battery. Charge the device every three months to maintain its performance.

5. This product has a built-in DC motor, which may generate sparks during operation. Please do not use it in an environment with dust or explosive gas

6. If there is abnormal noise or the temperature is too high during the inflation process, please turn it off immediately.

7. Do not run the equipment unattended to avoid danger.

8. Please use it in a dry and clean environment. The intrusion of sand and dust may damage the product. Do not wash the product with water.

9. Please use the certified 5V/2A adapter and the accompanying charging cable to charge this product. Failures caused by failure to operate as required are not covered by the warranty.

10. After long-term operation, the temperature at the connection between the air pipe and the device will become very high. To avoid burns, please avoid touching it.

Price matching policy is not applicable. No price difference refund.

WHAT IS COVERED

1.Received defective or used (proof needed) products;
2.Received with missing parts;
3.Defective item under proper use.

WHAT IS NOT COVERED

1.Purchased from non-Aborder Products or other physical stores;
2.Gift without proof of purchase;
3.Tampering/abnormal use/accidental damage;
4.Replacements and parts,
5.Installation fee/labor fee.

MAKING A CLAIM

Gifted parts, replacements, consumable products are not covered by the 2-year warranty. Manufacturer's warranties may not apply in all cases, depending on factors such as use of the product, where the product was purchased, or who you purchased the product from. Please review the warranty carefully, and contact the manufacturer if you have any questions.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
