Quick Start Guide

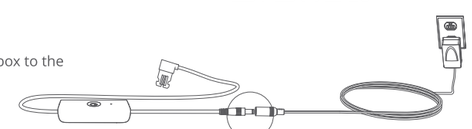

Step 1

Before assembling, watch the video tutorial. The tutorial can be accessed any of the following methods.

- Search and find the “Govee Glide Hexa Light Panels Installation Tutorial” video on our official YouTube channel.
- Scan the QR code pictured on the right.

Step 2

Download Govee Home App. Connect the control box to the power adapter and plug into power.

Step 3

In Govee Home App, add model "H6061" and follow the in-app instructions step by step.

Note:

Before Installation:

- Plug each panel into power individually to check that each lights up.
- Only connect panels and linking cables together **AFTER** you have designed your layout in the app and are provided the linking cable slot number instructions for your design.

After Installation:

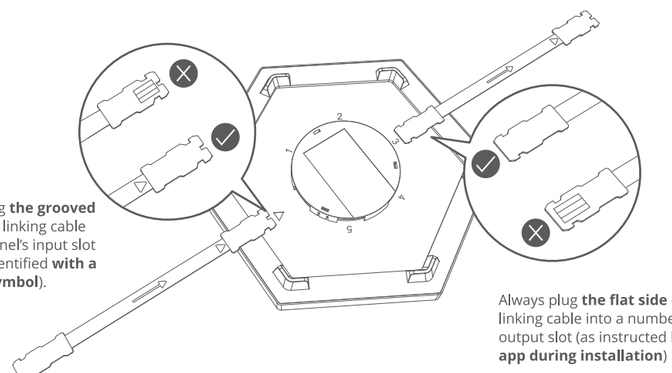

- Follow the in-app instructions to finish calibrating. Then Enjoy your design!

Caution: Maximum of 2 linking cables can be plugged into a panel.

Always plug **the grooved side** of the linking cable into the panel’s input slot (the slot identified **with a triangle symbol**).

Always plug **the flat side** of the linking cable into a numbered output slot (as instructed by **the app during installation**)
