Using Shelly Smart Control to change the Display Units on a Shelly H&T Gen3 to Fahrenheit.

Introduction

By default, the Shelly H&T Gen 3 displays the temperature in Celsius. Use the following steps to change the displayed temperature units from Celsius (°C) to Fahrenheit (°F).

Waking the Device

Before changing the temperature units displayed on the device, it is recommended to wake the device. To wake the device,

1. Open the device.

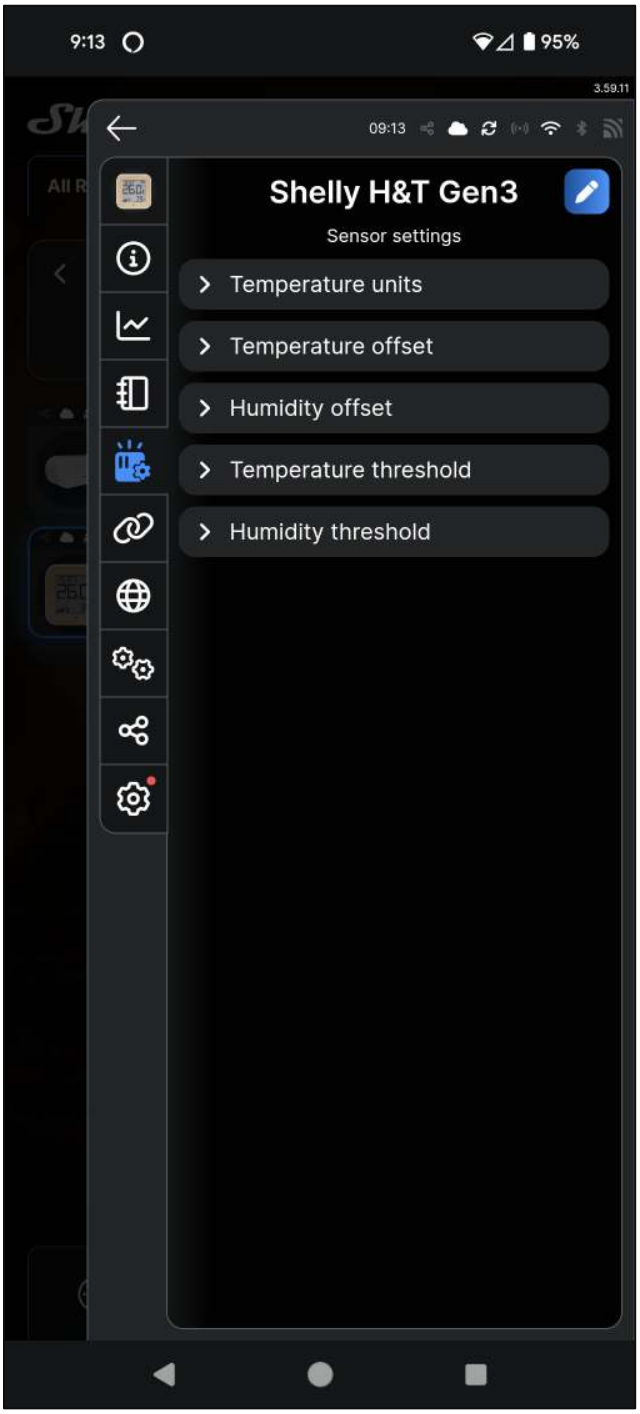

2. Press the **Reset** button.

Changing the Temperature Units

1. Open the Shelly Smart Control app.
2. Tap the Room where the H&T Gen3 is located.
3. Tap the Shelly H&T Gen3.

4. Tap the **Sensor settings** button represented by an icon displaying the device and a gear.

5. Tap **Temperature units**.

6. Tap the **°F** button. A message is displayed: *Setting saved successfully. The device is currently sleeping. It will update once it wakes up.*

7. Wake the device as explained in the previous section of this document.
8. Tap the back arrow in the Smart Control app.
9. The device displays the temperature in Fahrenheit.
