The UPS Factory Warranty Status tool is designed to help you calculate your product's factory warranty period. APC product warranties are a based on a fixed period of time starting from the purchase date of the unit. Duration of warranties are specific to each product. If proof of purchase cannot be obtained, the warranty duration is calculated from the manufacture date of the unit. The UPS Factory Warranty Status tool provides both the manufacture date and the warranty duration for your product to assist you in determining your product's factory warranty coverage.
