Antenna Port: The antenna can extend the Wi-Fi range.
WAN Port: Connects to the Internet Router.
VGA Port: Connects to a monitor (LCD).
HDMI Port: Connects to a high-definition TV.
USB Port: Connects to a mouse or USB device.
NVR Power Input: 12V 2A.

Camera Power Input: 12V 1A.
RJ45 Port: Used for pairing the IPC camera and establishing a wired connection with the NVR. Our Wi-Fi NVR kit is already pre-paired before delivery. If you need to re-pair the camera or use a wired connection, please refer to the instructions below on how to add an IP camera.
The RJ45 port also serves as a backup for wired network transmission. You can also use a network cable to transmit video if the Wi-Fi signal is weak or unavailable.

## 3.6 App Installation

### 3.6.1 APP Download and Installation

- Search for "HonestView" or "EseeCloud" in the App Store (iOS 9.0+) or Google Play (Android 5.1+). You can also scan the QR code in the NVR interface.

Honestview APP

Backup APP 'Eseecloud'

### 3.6.2 Register & Add Device

- Account Login:
  Register using your mobile number or email.

- Connecting the NVR to the Internet:

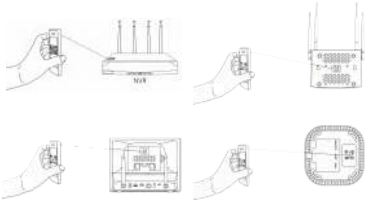

1. Use an Ethernet cable to connect the NVR's LAN port to your router. This allows remote viewing and mobile app access.
2. Open the app and tap "+" to add a device.

3. Scan the QR code on your NVR. Previously paired cameras will appear automatically.

- Adding a New Device:

4. On the "Add Device" screen, tap "Add" button.
5. Enter a name for the device to complete the addition successfully.

6. Select whether to share the device with others.
•Tap "Invite Family Members" to share the device.
•Tap "Skip and Invite Later" to complete the device setup immediately.

7. Device installation has been completed.

## 3.7 Alerts, Playback, and Remote Viewing

1. Tap the Info button on-screen to view alerts.
2. Tap News in the app to check motion detection events.
