Safety Information

To reduce the risk of fire, electric shock, or other injury, follow all instructions and safety guidelines.

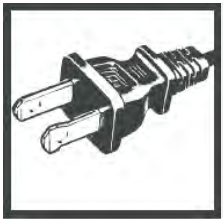

General Safety

- **Only** use your air purifier as described in this manual.
- **Do not** use without removing the plastic wrap from the filter. The purifier will not filter air, and may overheat, causing a fire hazard.
- **Do not** use your air purifier outdoors.
- Keep your air purifier away from water, and wet or damp areas. Never place in water or liquid.
- **Do not** use in excessively humid areas.
- Keep your air purifier away from heat sources.
- **Do not** use where combustible gases, vapors, metallic dust, aerosol (spray) products, or fumes from industrial oil are present.
- Keep 5 ft / 1.5 m away from where oxygen is being administered.
- Supervise children when they are near the air purifier.
- **Do not** place anything into any opening on the air purifier.
- **Do not** sit or place heavy objects on the air purifier.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.
- **Always** unplug your air purifier before servicing (such as changing the air filter).
- **Do not** use your air purifier if it is damaged or not working correctly, or if the cord or plug is damaged. **Do not** try to repair it yourself. Contact **Customer Support** (support@tredyhome.com).
- **WARNING: Do not** use this air purifier with solid-state speed controls (such as a dimmer switch).
- Not for commercial use. Household use **only**.

Power and Cord

- Keep air purifier near the outlet it is plugged into.
- **Never** place the cord near any heat source.
- **Do not** cover the cord with a rug, carpet, or other covering. **Do not** place the cord under furniture or appliances.
- Keep the cord out of areas where people walk often. Place the cord where it will not be tripped over.
- This air purifier uses standard US 120V, 60Hz outlets. If using outside of the US, check for compatibility.

READ AND SAVE THESE INSTRUCTIONS

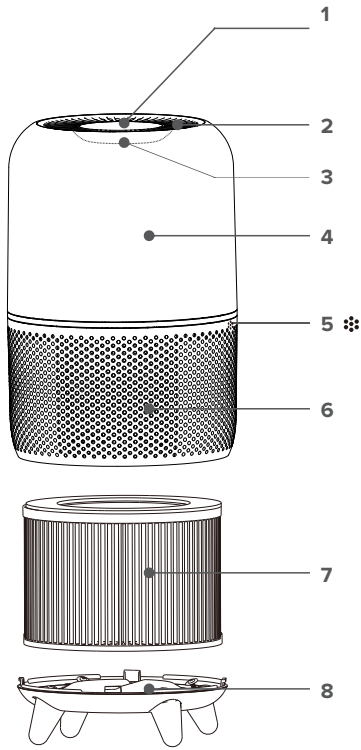

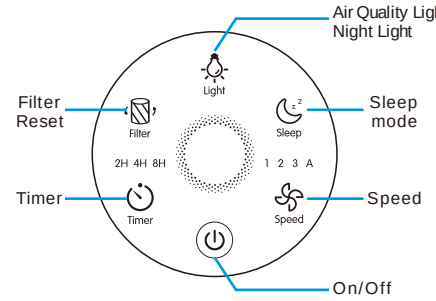

THIS APPLIANCE HAS A POLARIZED PLUG(one blade is wider than the other).To reduce the risk of electric shock,this plug is intended to fit in a polarized outlet only one way.If the plug does not fit fully in the outlet,reverse the plug.If it still does not fit,contact a qualified electrician to install the proper outlet.

DO NOT ATTEMPT TO MODIFY THIS PLUG OR DEFEAT THIS SAFETY FEATURE IN ANY WAY.

Know Your Purifier

Welcome using our company air purifier ,before use please read this manual carefully to operate the product correctly.

1 Touch-Control Panel

2 Air Outlet

3 AQ / Night Light

4 Body

5 Air Quality Sensor

6 Air Inlet

7 True HEPA 4-stage Filter

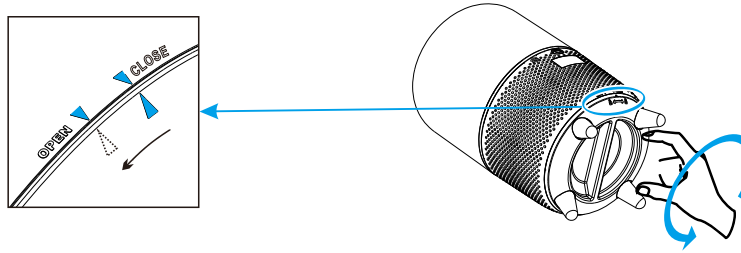

8 Base Cover With Legs

Before first use

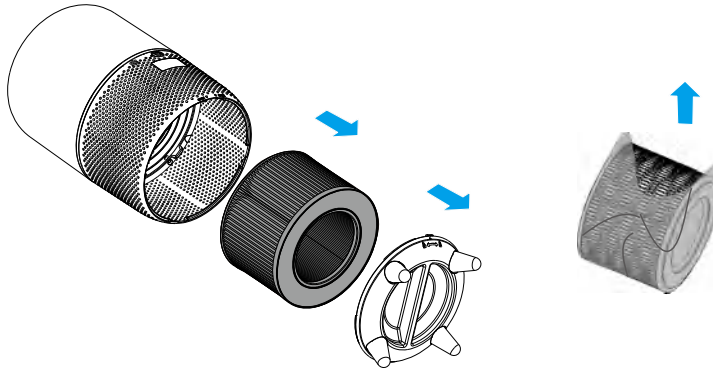

Important Notice:

Don’t start the air purifier until you remove the Plastic Packaging from the filter.

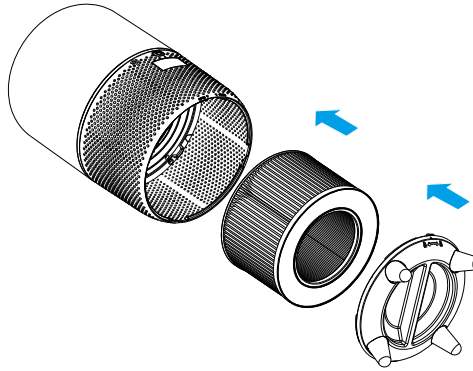

Step-1: Flip the air purifier over. Twist the base cover counterclockwise and remove it.

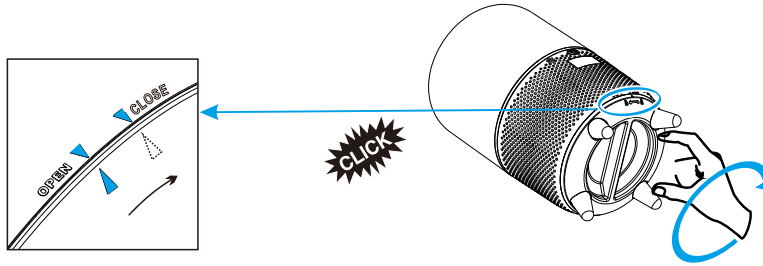

Step-2: Take out the new filter and remove the Plastic Packaging.

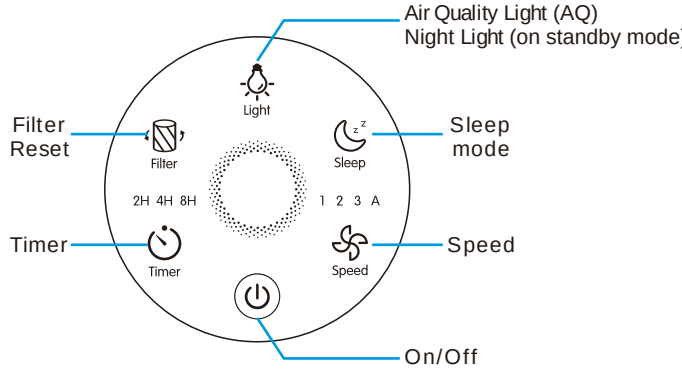

Step-3: Place the unpacked filter correctly back into the air purifier.

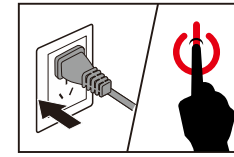

Step-4: Close the base cover and lock clockwise, be sure it’s closed tightly.

Control Panel: Touch Pad

1). Plug and turn on the machine

All lights will be ON for 1 second and you hear a beep, all lights then stay OFF .

2). On / Off button

Press ⏻ button, AQ light turns on and Speed at level 1 (Low) .

3). Fan speed adjustment

The fan speed light indicates at which fan speed the appliance is operating. Press Speed button to adjust fan speed level, 1~3 refers to **Low** , **Medium , High level** and **A** refers **to Auto mode**.

At Auto mode, the fan speed will be automatically adjusted according to AQ level as below:

AQ Color	Blue	Green	Orange	Red
Air Quality	Very good	Good	Bad	Polluted
Speed at Auto mode	Sleep	1(Low)	2(Medium)	3(High)

4). Sleep mode

When you use the appliance in Sleep Mode, it works very quietly. Only the and buttons (If setting the timer) will be at half brightness, all other buttons light off. Press any other buttons(except and buttons) to exist the sleep mode.

5). Air Quality Sensor Light / Night Light

There is an air quality sensor inside the air purifier.
Note: Compared with professional instrument, the detecting resut of this air quality sensor may has tolerance in accuracy, we suggest you regard the sensor detecting result as a reference only.

Air Quality Sensor Light (AQ Light)

Air Quality Light Color will automatically change according to the air quality being detected.
RED = POLLUTED ; ORANGE = BAD ; GREEN = GOOD ; BLUE = VERY GOOD
Press the  once to enter air quality display mode, and press again to exit.

Night Light Mode (Machine Standby Status)

Enter the Night Light Mode:
Step-1 Press  button to switch Off, air purifier enter standby mode.
Step-2 Press  button Once, LED Light turns into orange as Night Light.
Step-3 Press  button again, LED Light turns to half brightness.
Step-4 Press  button third time, LED Light turns Off to exit Night Light mode.

6). Setting timer

You can set a timer for 2, 4, 8 hours.
1. Press  repeatedly to select a time. The timer will start automatically.
Note: The timer indicators will light up when active.

2. Once the timer has finished, the air purifier will power off.

3. To cancel a timer, press  until all timer indicators are off.
Note: You can change the fan speed at any time while the timer is on.

7). Filter replacement light

When indicator  lights, it means that you should check the filter if it need to be cleaned or replaced.
Note: The filter's lifetime is based to your house air quality and using time. Using the appliance in a humid environment will reduce the lifetime of the filter.

8). Memory Function

When the air purifier is plugged in, it will remember its previous fan speed setting.

Filter Replacement & Clean

1. Filter Replacement

When Should I Replace the Air Filter ?

It is recommended to change the air filter every 6–8 months. However, you may need to change your filter sooner or later depending on how often you use your air purifier. It is important to watch out for the following signs of expired filter:

- Increased operating noise
- Decreased airflow
- Clogged filter
- Increased presence of odors

NOTE:

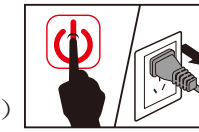

- The environment in which the air purifier being used may also extend or shorten the lifetime of the the air filter. Using your air purifier in an environment of relatively high pollution may mean you will need to change the air filter more often.
- If the air pollution in your environment is very high, there is a possibility that the filters may not be completely effective and may need to be replaced before lights up.
- Remember to reset the air purifier after changing the air filter.

How to replace the Air Filter ?

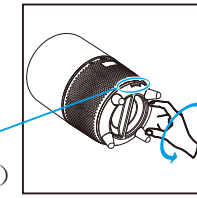

1. Switch off the appliance and unplug it. (a)

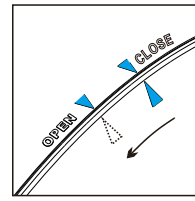

2. Put the appliance upside down on a soft cloth to avoid scratching, to open the base cover, you need to find an arrow point ▲ on the base cover corresponding the **CLOSE** position, turn the base cover counterclockwise from **CLOSE** to **OPEN** position, then the base cover released. (b)

(a)

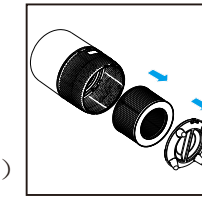

(b)

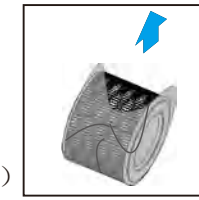

3. Remove the old filter. (c)

(c)

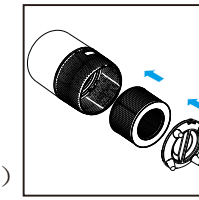

4. Remove the packaging material of the new filter. (d)

(d)

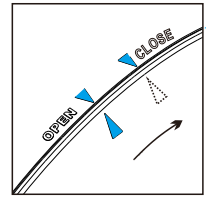

5. Put the new filter back into the appliance. (e)

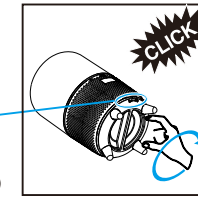

(e)

6. Turn the base cover clockwise from **OPEN** position to **CLOSE** position, you will hear a "click" sound, the base cover is fastened. (f)

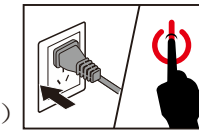

(f)

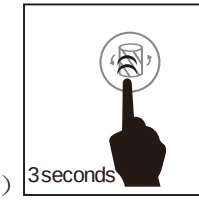

7. Put the plug in the wall socket and switch on the appliance again. (g)

(g)

8. Reset Filter's lifetime.
The filter lifetime should be reset if ‹ ▯ › lights up, after replacing the new filter, you need to reset filter lifetime.
1). Plug in the air purifier and turn it on.
2). Press and hold ‹ ▯ › for 3 seconds.
3). The light ‹ ▯ › will turn off, indicating that the reset is complete.

（h）

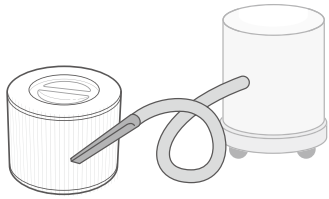

Filter replacement force mode

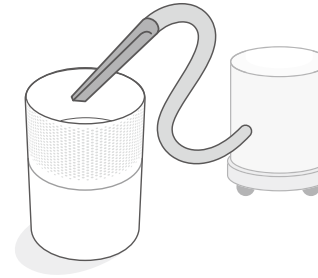

When using the air purifier in an environment of heavy pollution, the lifespan of the air filter may be significantly reduced. You can change the filters even if ‹ ▯ › does not light up. Follow the steps below to perform a hard reset.

1). Replace the air filters as mentioned in the Filter Replacement section.
2). Plug in the air purifier and keep in standby mode.
3). Press and hold ‹ ▯ › for 3 seconds, and it will light up.
4). Press and hold ‹ ▯ › again for 3 seconds, and it will turn off. The reset is now complete.

2. Keep Filter Clean

In order to keep your purifier working with more efficiency and life-time, clean the filter (pre-filter side only) every 2 weeks with the Instruction Below:
1). Clean out any dust, hair, or furs remain on the pre-filter by using the vacuum hose.
2). Clean out any dust, hair, or furs remain on the bottom cover by using the vacuum hose.
3). DO NOT wash the filter with any water or liquid.
