To avoid Personal injury, please observe the following rules:

1. Do not place the monitor on a sloping table unless there are security measures;
2. Do not drop or throw objects or toys onto the screen, because it will result in personal injury, product and the screen damage;

To prevent other injuries, please observe the following rules:

1. Please turn off the monitor when you leave for a long time;
2. Do not allow Children to throw or insert objects into the monitor;
3. Do not install spare parts that are not specifically designed for this device;
4. Please Unplug the power cord when the device is unattended for a long time.
5. Do not touch the power cord or signal cable when lightning strikes, otherwise it may cause electric shock;
6. Do not let any object compress or wrap the power cord;
7. Do not place the monitor where the power cord can be easily damaged.

To prevent the machine damage, the following situations should be avoided:

1. Place the monitor where it is easy to fall;
2. Place the display near a radiator or heat source;

Do not rub the screen with a hard object as it will scratch or permanently damage the screen.

Do not use your fingers to press the screen for a long time, otherwise it will produce screen smear, and even a screen damage.

Red, green, and blue pixel defects may appear on the screen, but it does not affect the display function.

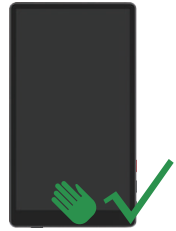

The power cord is the main isolation device and must be put in an Easy-to-operate place.

If possible, try to use the recommended resolution for best results. Because if you use other resolution other than the recommended resolution,a screen abnormality may occur. But this is a feature of a LCD panel with the fixed resolution.

A still picture on the screen for a long time will cause damage to the screen and produce afterimages. Please make sure to use the screen saver, the afterimage and related issues are not covered in the scope of product repairing warranty.

iPhone location settings

iPhone users need to set their locations

iPhone Connection

Connecting Your iPhone to a Selfie Vlog Monitor

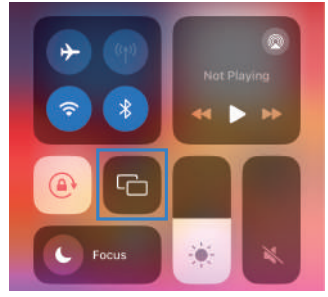

* 4K recording performance varies by iPhone model: iPhone 16 series – Delivers smooth 4K at 60-120 Hz; iPhone 15 series – Runs smoothly at 4K 30 Hz, with slight lag at 60 Hz; Older iPhones – Often struggle with 4K; for the best results, use the Blackmagic Camera App for silky-smooth 4K footage.

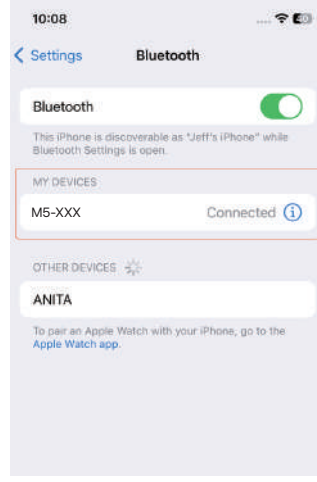

Step 1: Swipe down from the top menu and open "Screen Mirroring."

Step 2: Select the device named "M5-XXX" and enter PIN: 0000 if prompted.

※Please follow the steps below to use the camera button
Step 1: Go to Settings > Bluetooth and connect to "M5-XXX."

Step 2: Open the Camera app to take photos or videos using the monitor's Bluetooth button.

Android Phone Connection

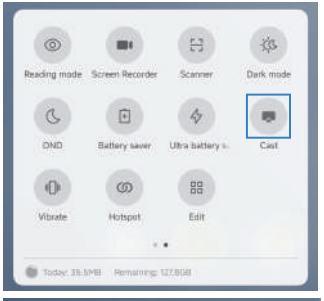

Connecting Your Android Phone to a 5-Inch Selfie Vlog Monitor

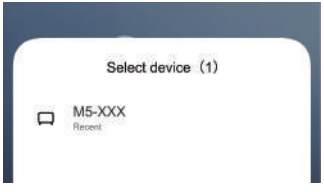

Step 1: Swipe down from the top menu on your Android phone to access the “Cast” function.

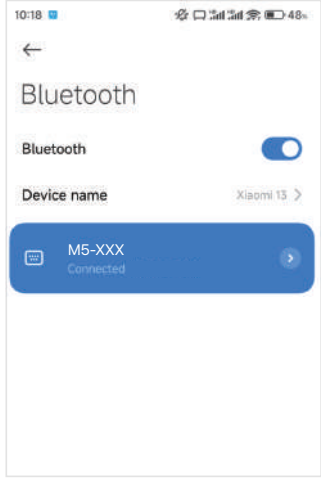

Step 2: Choose the device named “M5-XXX”.

※Please follow the steps below to use the camera button
Step 3: Navigate to Settings > Bluetooth on your Android phone and connect to the Bluetooth device named “M5-XXX”.

Step 4: Launch the Camera app on your Android phone. You can now capture photos or videos using the Bluetooth button on the 5-inch selfie vlog monitor.

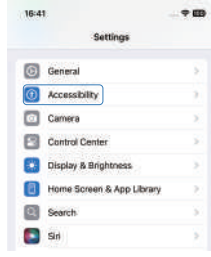

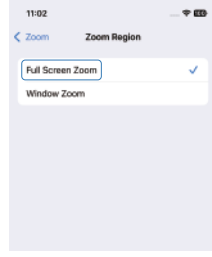

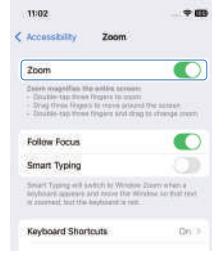

How to Enable Touch for iPhone

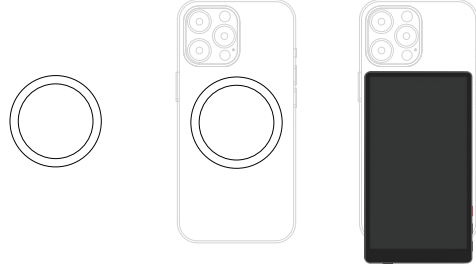

For iPhone users:
Step 1: Go to Settings -> Accessibility -> Zoom -> Zoom Region, and select Full Screen Zoom
Step 2: Go back and turn Zoom On
Tip: If the screen appears too large, double-tap with three fingers to return to normal.

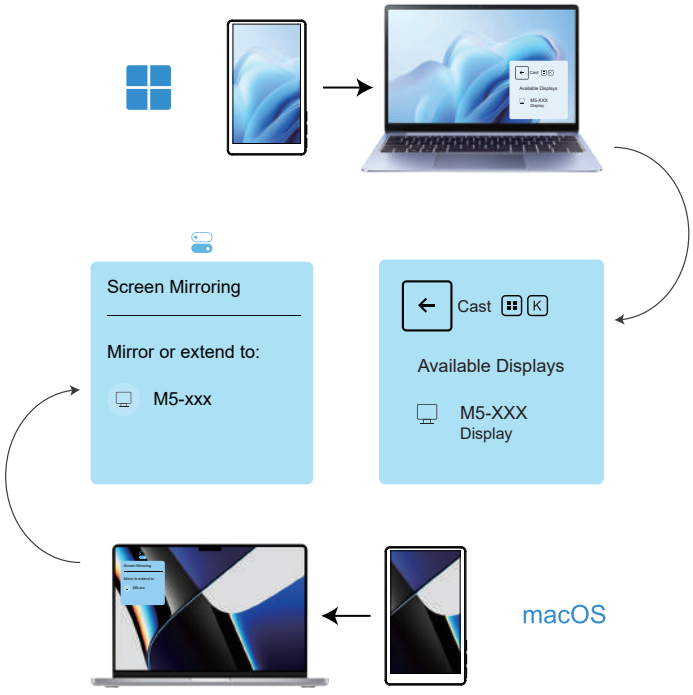

How to Use Magnet Sheet

Please note:
1. iPhone 12 and above: No need for a round magnet sheet; they have a built-in magnet.
2. Android phones: Need to use a round magnet to stick on the back of the phone.

Laptop wireless screen cast

Laptops can be wirelessly cast to this 5-inch monitor:
