Quick Start Guide

Download the App

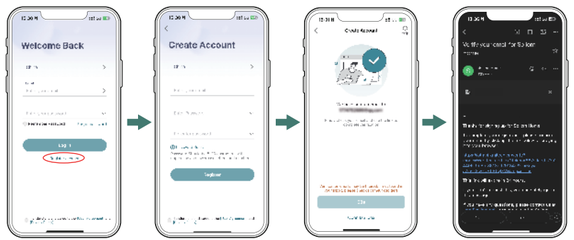

Scan the QR code below with your smartphone to download the Soliom Home app.

Available on the App Store

Get it on Google play

Create an Account

① Tap Register
② Select your region
③ Enter your email address
④ Create a password
⑤ Your Soliomhome account is now ready.

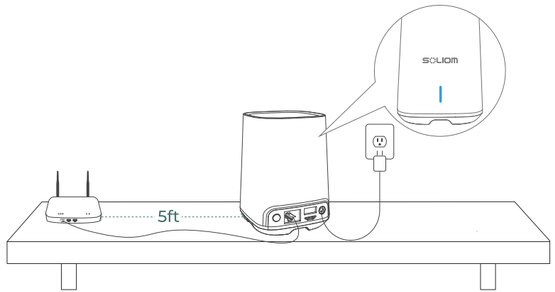

TIP:
A verification email may be sent to confirm your account

Before You Start

- Plug in the SoliomBase
- Connect it to your router
- Turn on Bluetooth on your phone
- Stay within 5 ft (1.5 m)

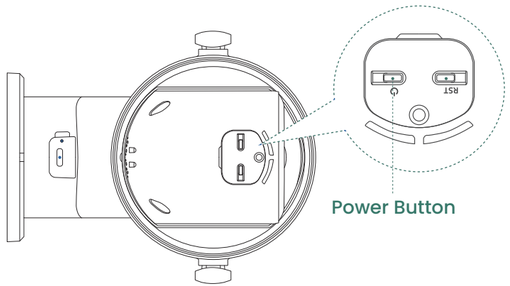

Power On the SoliomBase

Connect the SoliomBase to power and your router.
Wait until the LED turns solid blue.

Turn On the Camera

Press and hold the power button for 3–5 seconds.

Add Device

Open the app → Tap "⊞"
Scan the QR code on the SoliomBase, and the LED turns solid blue

Setup Complete

You're all set!
Setup takes about 3–5 minutes

Can't Connect?

Try the following:

- Make sure the Ethernet cable is securely connected to both the SoliomBase and your router
- Wait until the SoliomBase LED turns solid blue
- Move your phone closer to the SoliomBase
- Restart the device and try again

SoliomBase LED Status:

Red (Solid) – Not paired
Blue (Flashing) – Pairing in progress
Blue (Solid) – Connected and ready

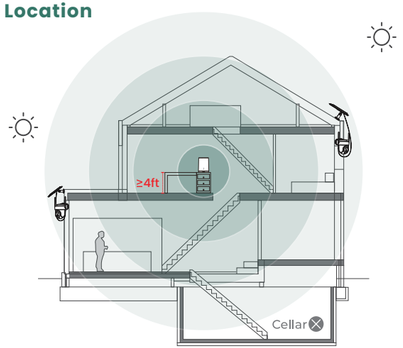

Camera LED Status

Blue (Flashing) – Pairing in progress
Blue (Solid) – Connected and ready
Green (Solid) – Charging
LED Off – Fully charged

TIP:
If the LED does not match the expected status, please check the power or network connection.

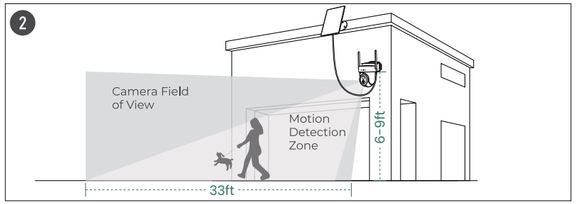

Choose Location

①

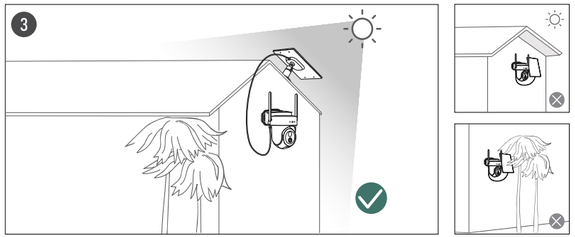

Camera install 6–9 ft (1.8–2.7 m) above ground

②

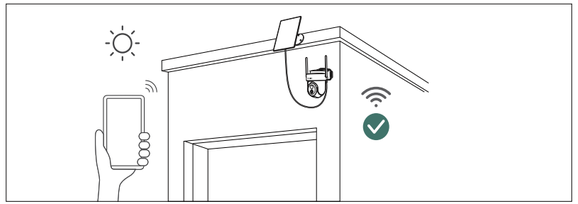

Avoid obstacles that may block its line of sight (e.g.,eaves, tree branches).

③

Check Signal

Ensure strong Wi-Fi signal before installation

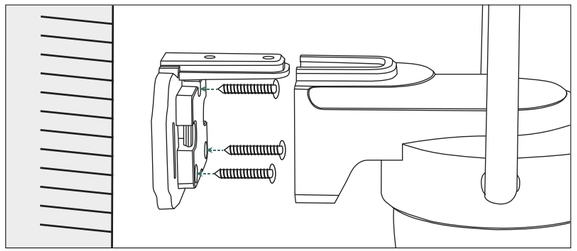

Wi-Fi Signal Tips

For best performance, install the camera within a reliable range of your router or SoliomBase.
Walls, metal objects, and long distances may weaken the signal.

Mount the Camera

Secure the bracket with screws
Attach the camera

Installation Tips

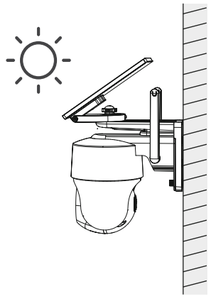

Avoid pointing the camera directly at reflective surfaces like glass or water.
Do not install facing strong light sources (sunlight, street lights), which may affect image quality and detection

Solar Panel Installation

Choose the best setup for your environment

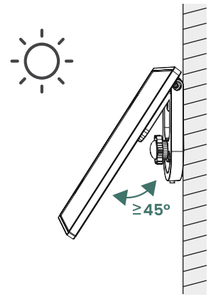

Option 1

Mount it on top of the camera for a compact setup

Option 2

Install it separately on a sunny wall for better charging performance

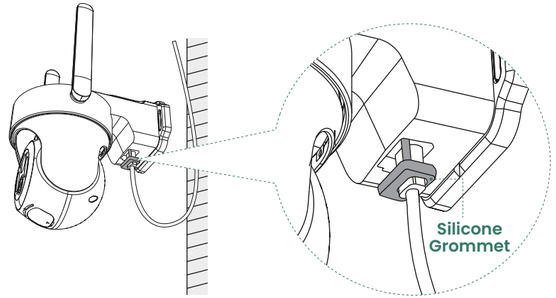

Solar Charging Tips

For best results, place the panel where it receives maximum sunlight.
The solar panel requires sufficient direct sunlight to maintain battery levels.
Performance may vary depending on weather, season, and installation angle.
In low sunlight conditions, occasional manual charging may be needed.

Tip for Weather Protection

Make sure the charging port is fully sealed

Feed the Type-C connector through the silicone grommet and insert it into the camera's charging port.

Care & Maintenance

Solar Panel

Clean the solar panel regularly to ensure efficient charging.
Remove dust, dirt, or leaves that may block sunlight.

Lens

Wipe the lens gently with a soft, dry cloth to maintain clear image quality.
Avoid using harsh chemicals or abrasive materials.

Battery & Performance

Ensure the camera receives sufficient sunlight daily for optimal performance. In low-light or winter conditions, manual charging may be required.

Tip:

Designed for low maintenance， simple cleaning keeps your system running smoothly.
