Quick Start Guide

Mesh Point Overview

LED States

Ready to Add

The three middle LEDs will continually flash on and off indicating a Mesh Point is ready for configuration.

Booting Up

Once configured, the LEDs will indicate the device is booting up with a looping motion of the LEDs lighting up from bottom to top.

Searching for Network

The LEDs will indicate the Mesh Point is searching for the network by lighting up from the middle outwards.

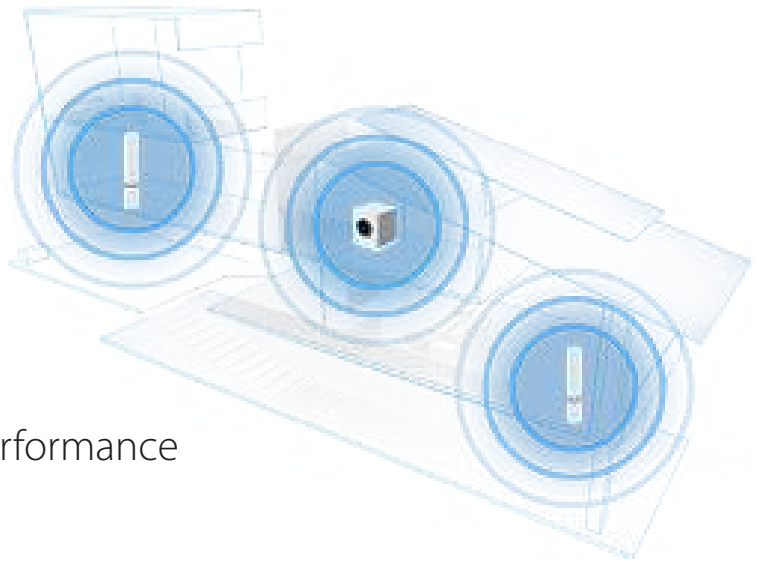

Connected

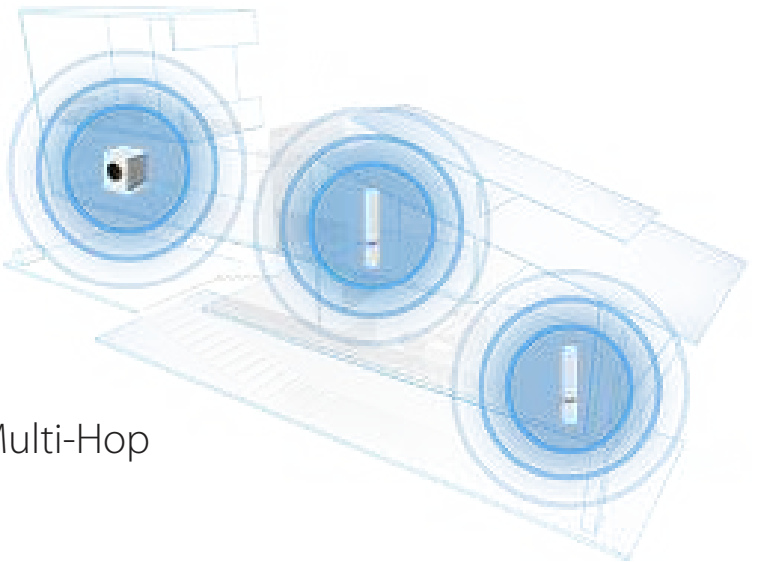

Once the Mesh Point is connected, the LEDs will represent the signal strength.

Installing the Mesh Points

For best performance, the Mesh Points should be placed in different directions between the Router and the areas farthest from the Router. Mesh multi-hop should only be used when necessary as performance will degrade with each hop.

Best Performance

Mesh Multi-Hop

1 Plug the Mesh Point into a power outlet.

2 The Mesh Point will be in the *Ready to Add* state with the three middle LEDs flashing on and off.

3 Launch the app and follow the instructions for the router you are connecting to.

- Third-Party Router - Page 10

Ensure that Bluetooth is enabled on your smartphone.

Connect to an AmpliFi Router

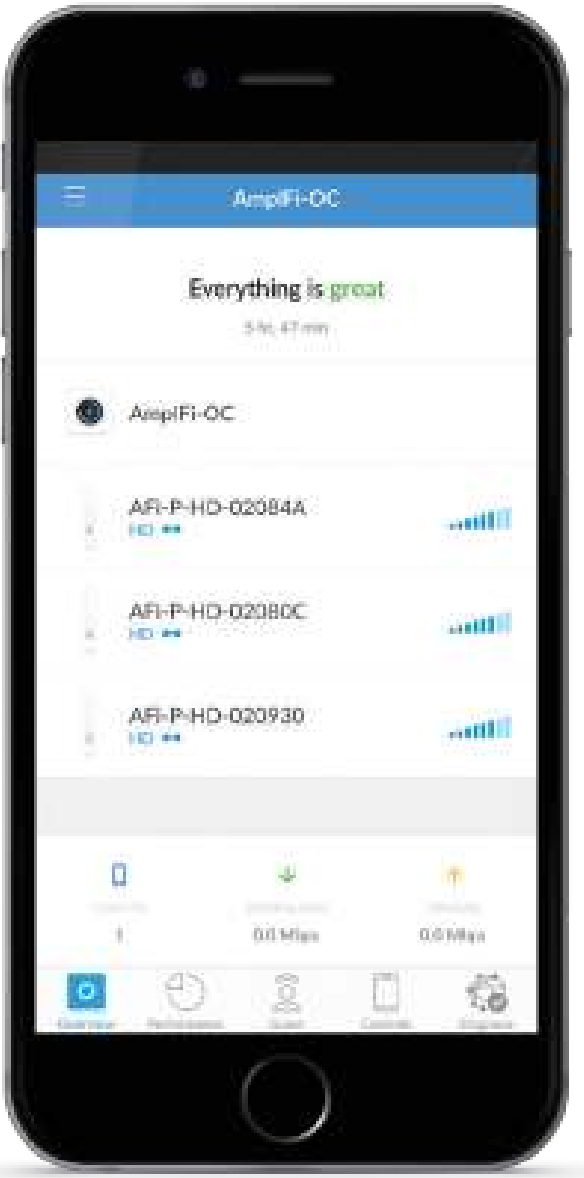

1 If your AmpliFi Router is already up and running, once you launch the app the new Mesh Point should be displayed. Tap **Add to Network**.

2 Edit the name of the Mesh Point if desired. Tap **Continue**.

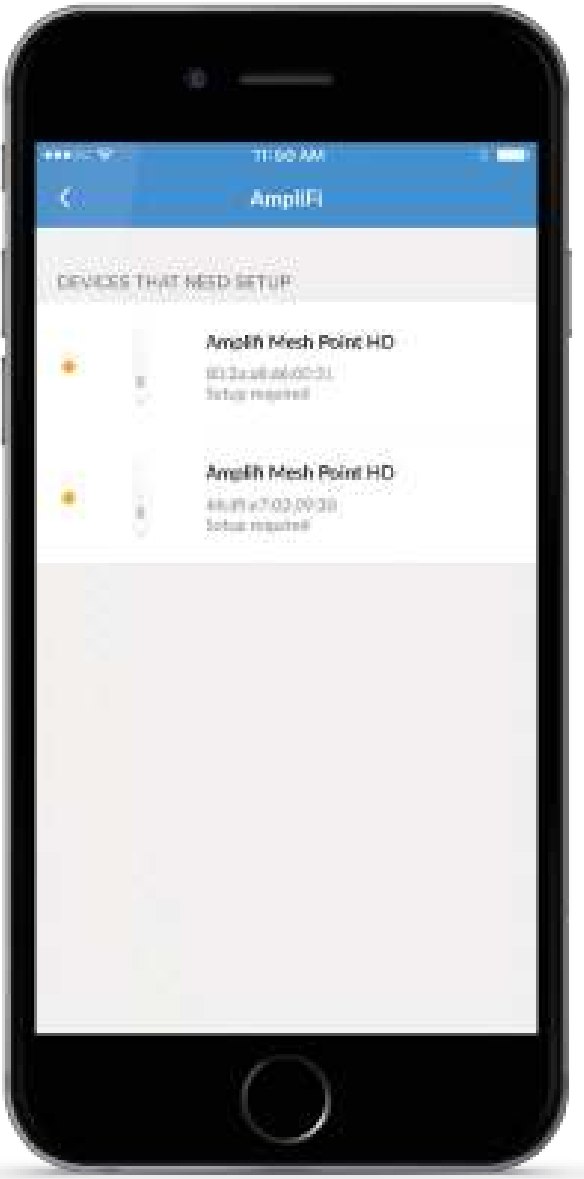

3 After about a minute, the LEDs on the Mesh Point will reflect signal strength once connected to the Router. The *Overview* screen in the app will appear and show the Mesh Point connected.

Connect to a Third-Party Router

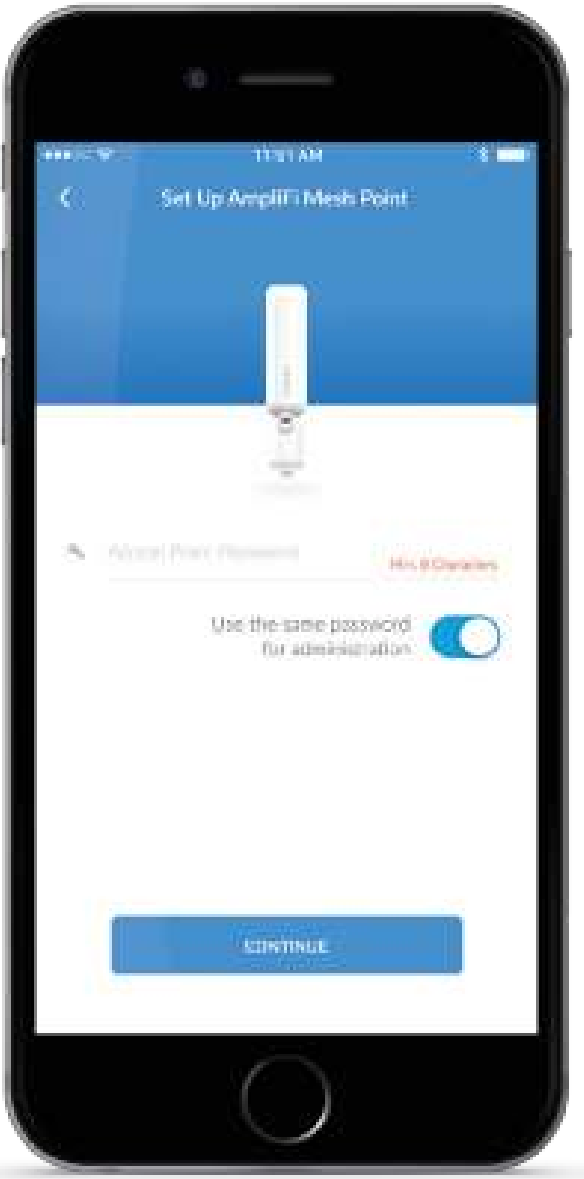

1 Select the device that needs to be configured (if more than one Mesh Point is being installed).

2 The app will display a list of available Wi-Fi networks. Select the network associated with your Router.

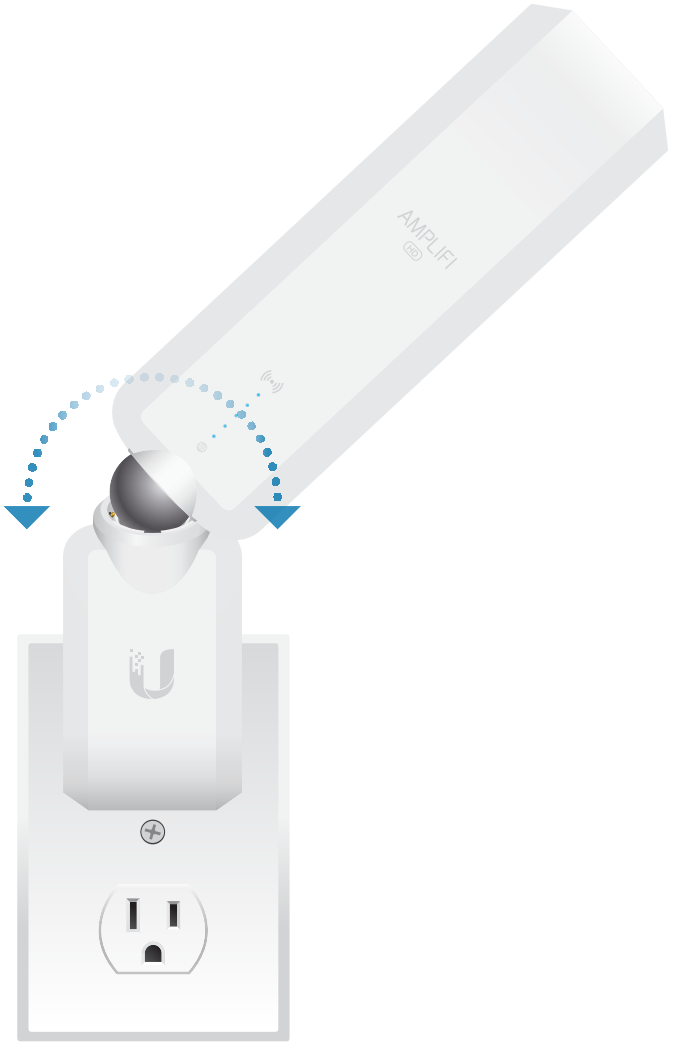

3 Enter the password associated with the wireless network and tap **Continue**.

An audible tone will indicate successful configuration. After about a minute, LEDs will reflect signal strength once the Mesh Point is connected to the Router.

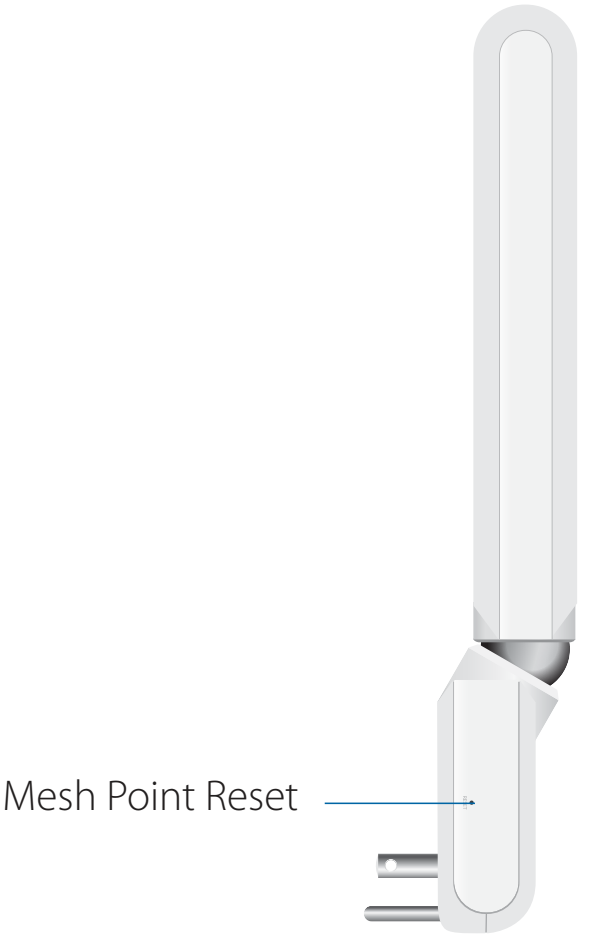

Adjusting the Antenna

The Mesh Point antenna can be adjusted to provide optimal signal coverage for your location.

Resetting to Factory Defaults

Factory default settings can be restored by using an object such as a straightened paper clip or pin to press the Mesh Point Reset for approximately 10 seconds until the LED turns off and an audible tone is heard.

If the Router is reset, all Mesh Points must also be reset.
