Note: DO.NOT plug the adapter into your computer before disabling the built-in Bluetooth.

② Right-click the in the taskbar and choose "Add a Bluetooth Device" or select "Start" > "Settings" > "Devices". Please ensure to turn on your device's Bluetooth.

③ Select your Bluetooth device from the list and follow the wizard to complete pairing.

①

②

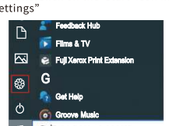

③

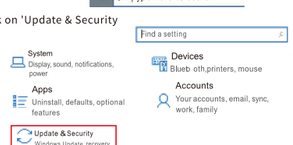

Ⅲ. Windows 8.1/10/11 (Plug and play)

The usage method is the same as step❸, If unsuccessful,please check if the automatic update of Windows system is enabled or download the driver online: https://bit.ly/48spVc1

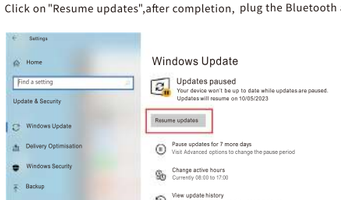

The operation is as follows:Click on the"Start"icon in the bottom left corner of the computer--"Settings"

Click on 'Update & Security

Click on "Resume updates",after completion, plug the Bluetooth adapter again

Troubleshooting

1. Why is the Bluetooth function not working and computer shows " " or "Error Code 31"?
   1. The built-in Bluetooth in your computer is not disabled, causing the adapter cannot enable the driver, please disable it,
   2. Install the latest driver.
2. What should I do if the Bluetooth icon doesn't appear?
   ① Make sure you have turned on the Bluetooth in Windows settings
   ② Sometime the Bluetooth icon may be hidden: select "Start " > "Settings" > "Devices" > Click "More Bluetooth Options" > "Options" > Check "Show the Bluetooth icon in the notification area".
3. Why can't i find my Bluetooth device?

   Please ensure your Bluetooth device is in pairing mode.

   Keep your Bluetooth device around/near the adapter at a range of 20m/66ft.

   Please replug the adapter

   TIPS:

   1.Before doing the pairing job,please turn off the Bluetooth function of your other device,such as your cellphone to aviod your Bluetooth device such as Bluetooth headset wrong reconnection and it can't enter into pairing status.

   2. you can unplug the adapter and wait for 15 seconds before plugging it in and trying again.
