1.Plug and Play for Windows 11/10/8.1 OS system:

1. But if any issue, you also download and install the driver manually.

2. Or check if the automatic update of Windows system is enabled.

1) Go into computer **"Settings"**.

2) Click on **"Update & Security"**.

3)Click **"Resume Update"** and then plug the Bluetooth adapter again.

2.If your PC has no Bluetooth driver or there is the issue for the Bluetooth driver on Windows 11/10/8.1 or your PC is Windows 7 OS system.

Please download & install the driver as the below information:

1) Download the driver from the website **https://bit.ly/48spVc1** get the zip file**<6.0 >** about 23M

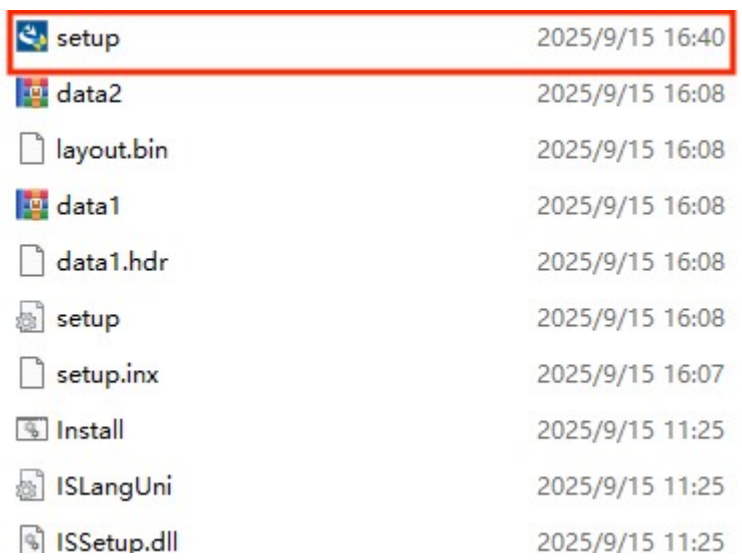

(Please note to must extract the file to install it correctly.)

2) Please unzip the file**<V6.0 >** and get the the below file:

3) Please go into the file **< 6.0_RTBlueR_Windows_3032.3033.1040.0816.2025_F027_L>** and find the **<Setup>** to click it to install the driver directly.

3. Before you start using this adapter, disable all existing Bluetooth devices (Both Built-in and External) from the PC "Device Manager"。

Notes:
