Warnings!

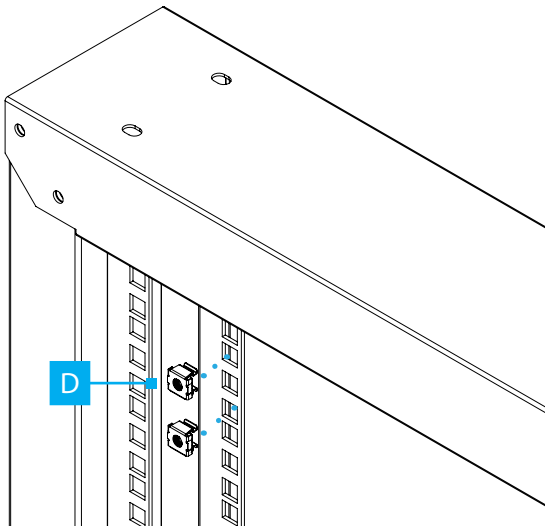

- StarTech.com Ltd. is not responsible for any property damage and/or personal injury resulting from the installation procedures outlined in this technical document
- Read the entire Quick-Start Guide and ensure the instructions are fully understood before using this product
- Refer to the manufacturer of the Server Rack to determine the mounting hole type and size
- If the Server Rack Mounting Posts have M5 threaded holes, the included M5x12mm Rack Screws can be installed without Cage Nuts. Use the manufacturer-recommended Screws if they differ from the ones included
- Never operate this product if parts are missing or damaged
- Do not touch the product under power if the product has an exposed printed circuit board or electrical wire
- If the connected equipment overdraws excessive current for more than a few seconds, the Circuit Breaker in the Power Delivery Unit will trip to help prevent potential equipment damage. Inspect the connected load and disconnect any non-essential or malfunctioning devices as necessary. Allow the Power Delivery Unit to cool down for at least 60 seconds before pressing the Manual Reset Button to restore functionality
- Never insert foreign objects into the PDU outlets. Doing so may result in electric shock, fire, serious injury, or irreparable equipment damage. The outlets are designed exclusively for use with compatible power plugs. Always follow the manufacturer's instructions and applicable safety standards.

Note: *This unit is only to be used inside racks within computer, telecommunications, and cloud data center rooms.*
