Instructions for Ancel HD601 driver installation on Windows 7

1. HD601 enters the [upgrade mode], connect to the computer via USB, and see F503 USBxx VCOM in the Other devices of the computer device manager.

2. Check your operating system is 32bit or 64bit.

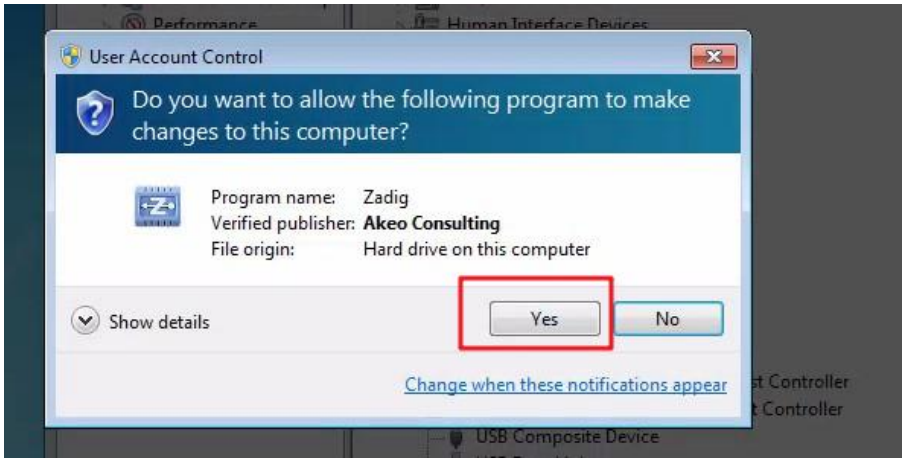

3. If the computer is 32bit, choose the HD601_driver_Win32bit file; If it is 64bit, choose the

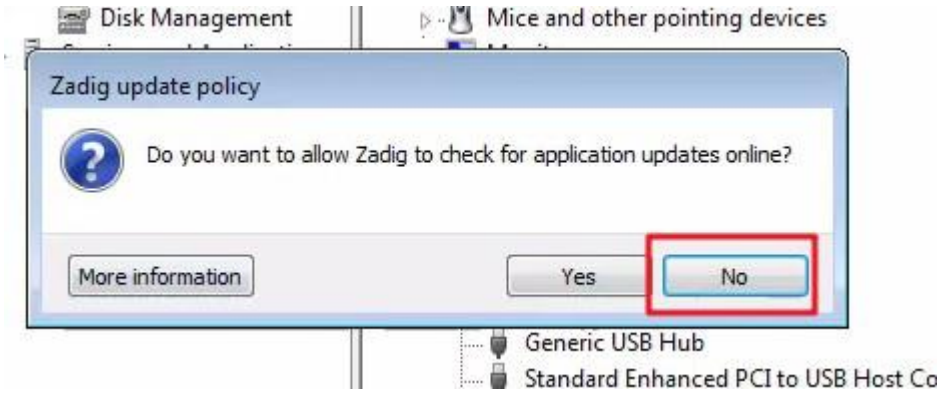

HD601_driver_Win64bit file.

4. Run“Step_one.bat”

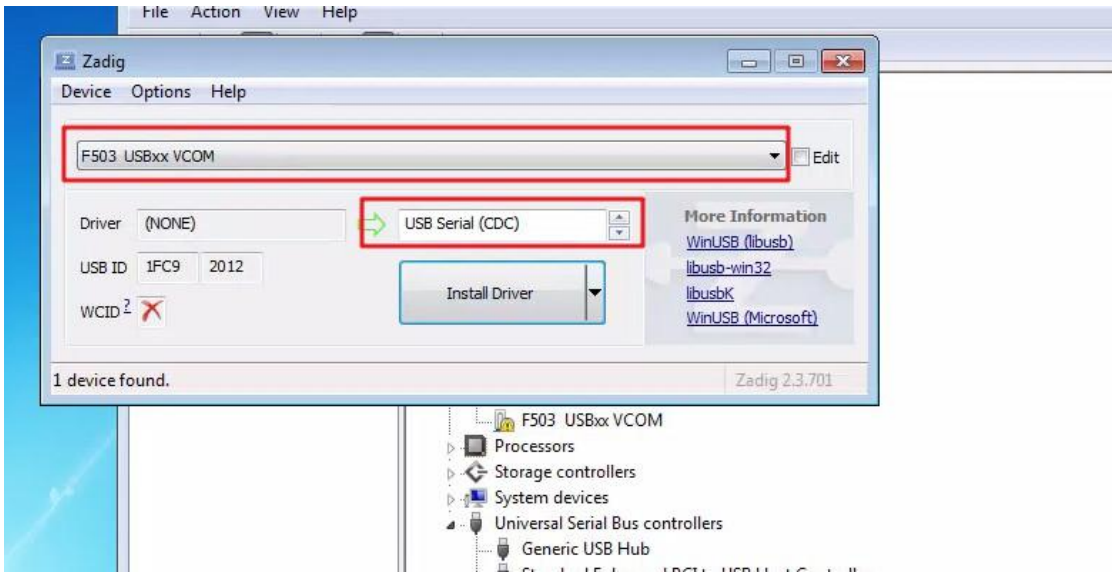

5.Return to the previous folder and runzadig-2.3.exe

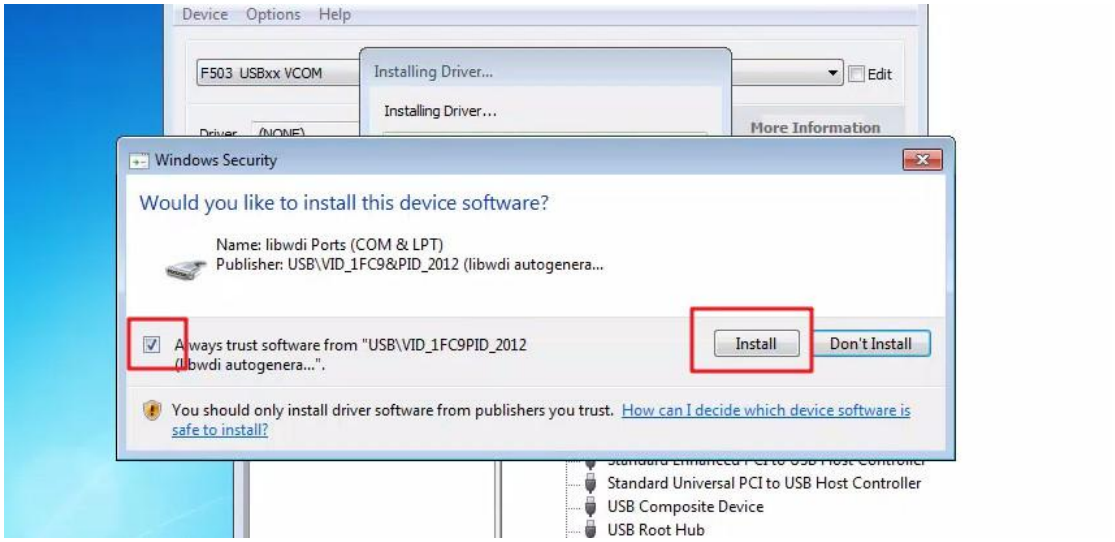

6. If prompted to upgrade the software, select [No];

7. Select F503 USBxx VCOM and USB Serial(CDC), click Install Driver.

8. Check [Always allow this software], click Install, and wait for the installation to complete.

9. After the installation, you will see F503 USBxx VCOM(COMx) under the Ports of the computer device manager. The number of the COM depends on the computer.
