✧ 1. Connect its WiFi. SSID: u f i _ XXXXXX. WiFi Keys: 8 8 8 8 8 8 8 8

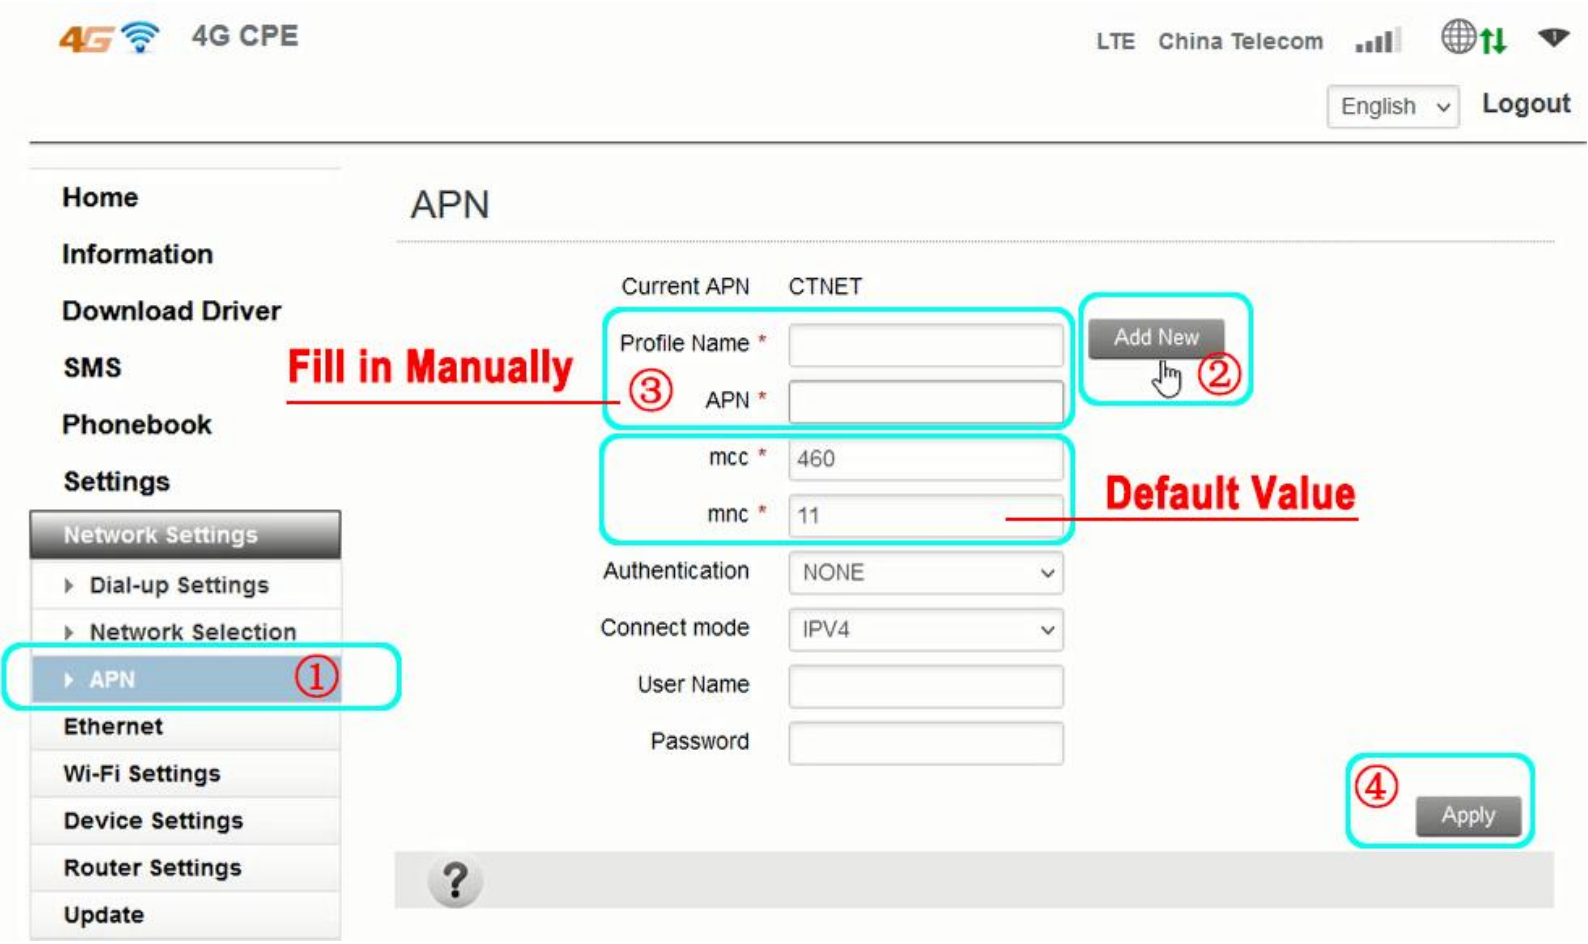

✧

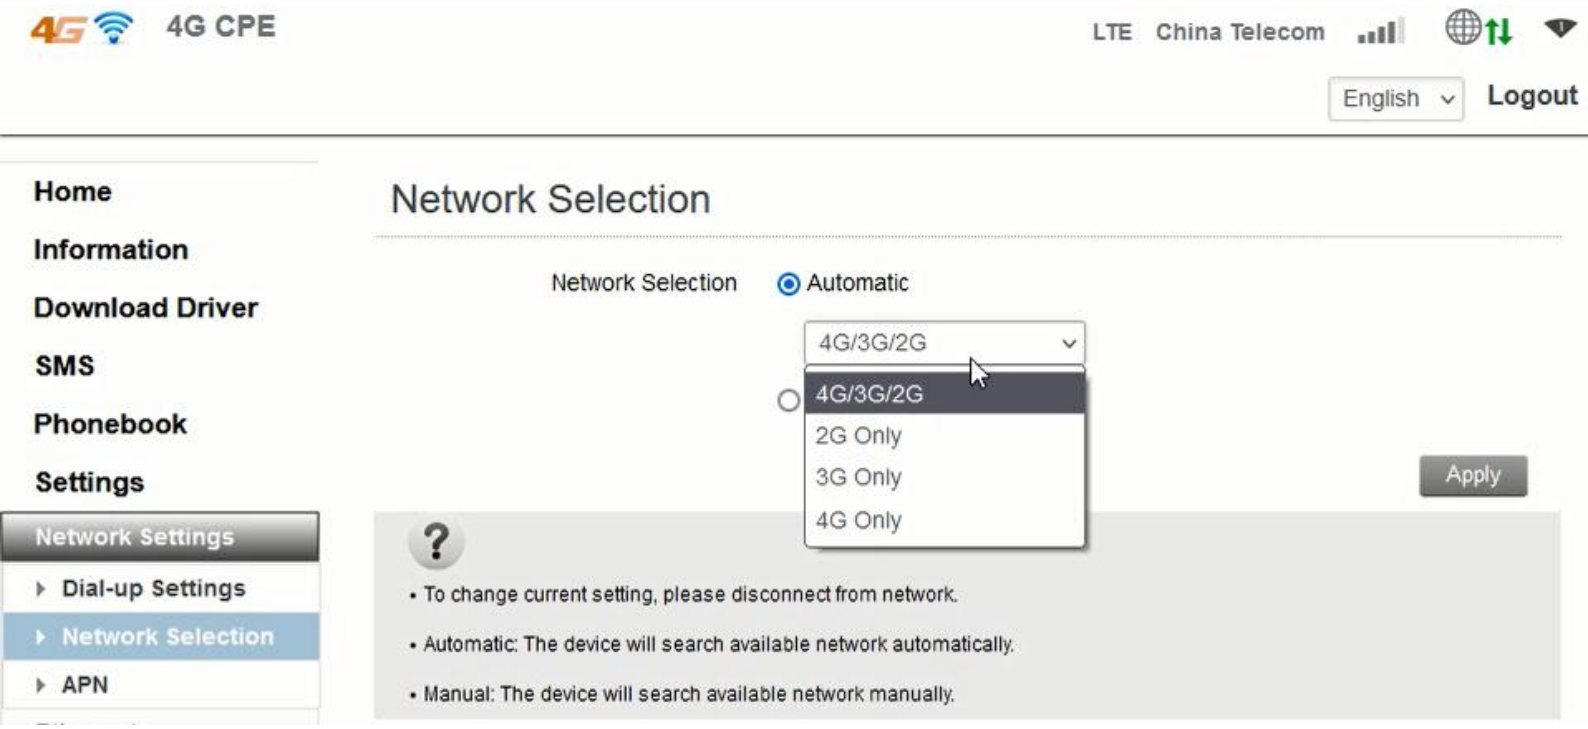

✧ 2. Login WebUI（192.168.0.1） User Name: admin. Password: admin

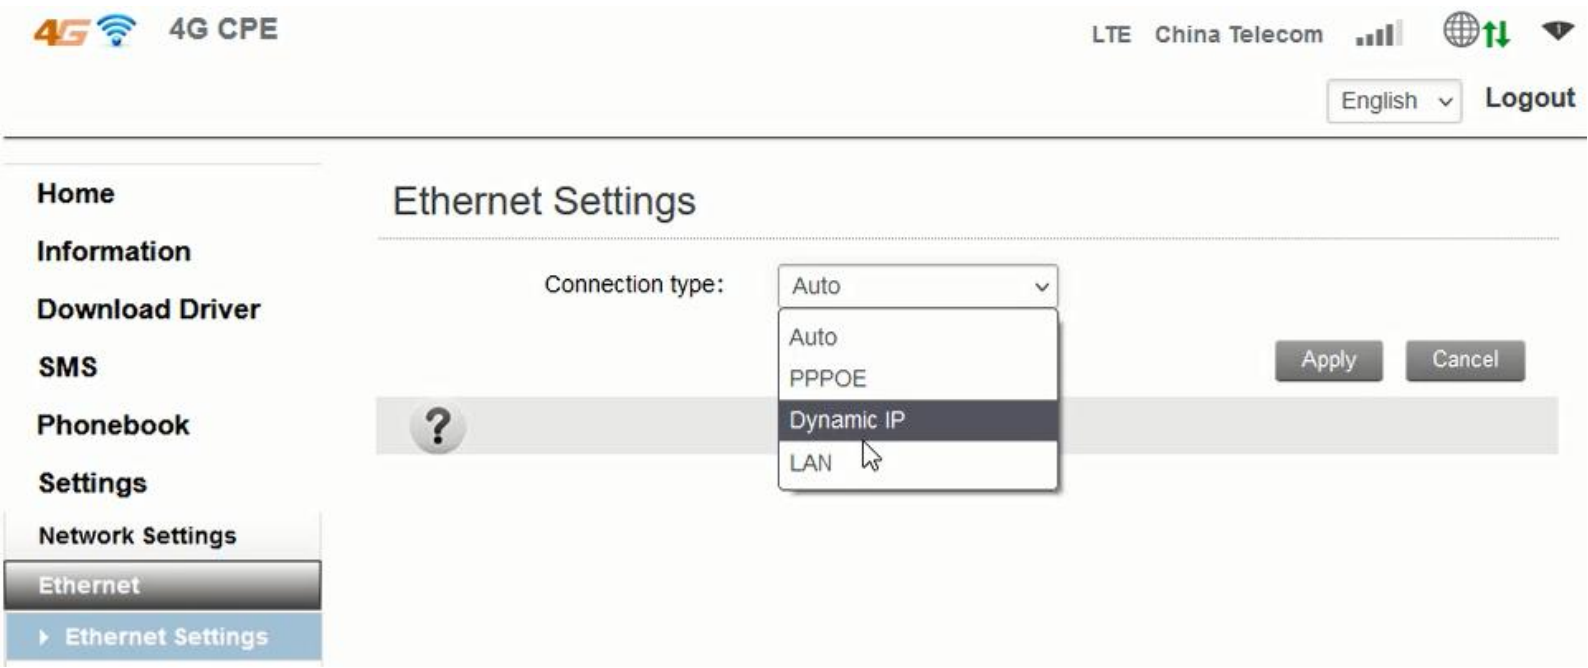

✧ **3. Set the correct APN manually (Click “Add New” to open the page)**

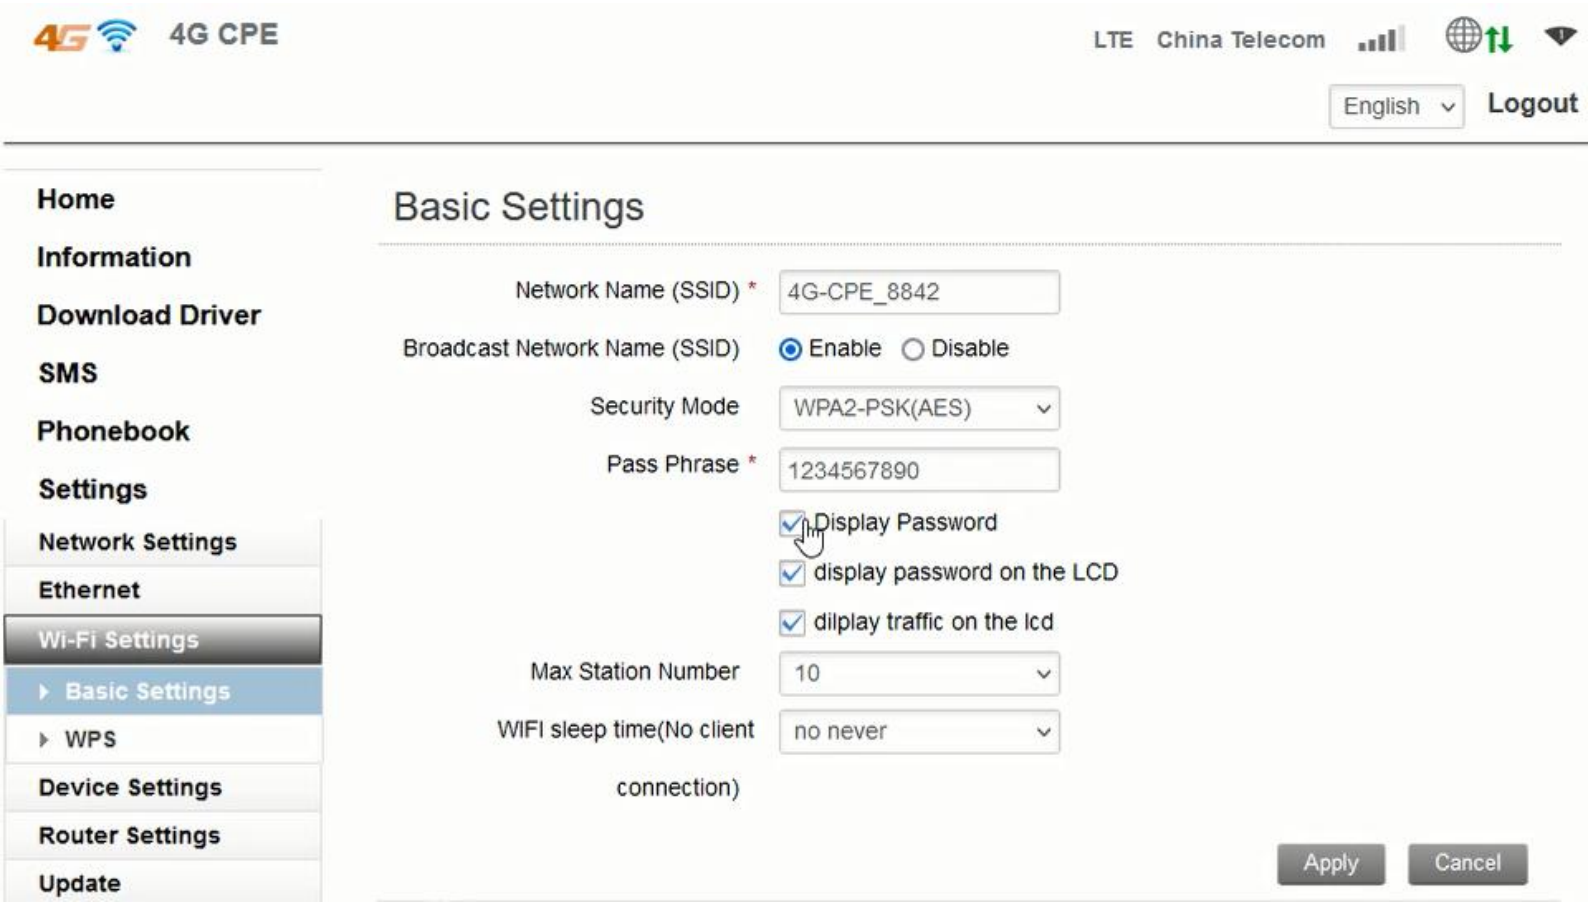

✧ **4. Make sure to set 4G priority if it has poor internet speed**

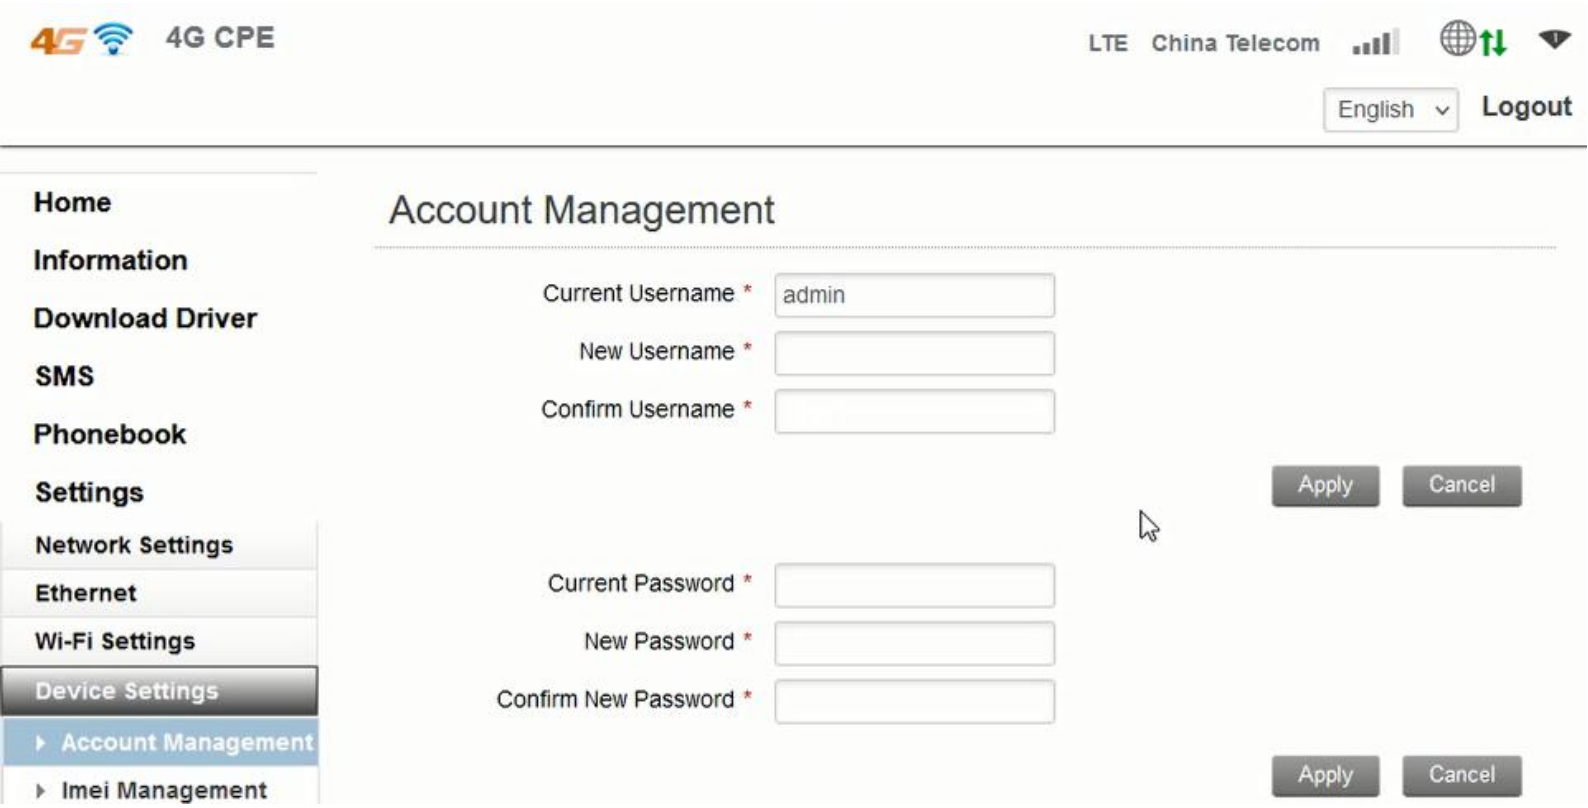

✧ **5. If you don't have a SIM card, you can use other modes like PPPOE**

✧ **6. Modify your WiFi SSID and Password**

✧ 7. Modify your WiFi SSID and Password

✧ 8. View APN information from cell phone / Contact SIM operator to get APN

NOTES

Connect WiFi but no network data connection.

At this time, you should confirm that the APN settings in the network settings are correct.

You can install the SIM card in your cell phone.

Then view the APN information in the mobile network access point.

Finally, set the correct APN manually in the network settings.

If there is a problem still, please contact the seller, your problem will be solved
