NOTE: Depth from 22 to 40 inches is available by adjusting the beams at corresponding silkscreen numbers on the beams.

2. Using two of the Beams assembled in the previous step, line up one set of Left and Right Vertical Rails, followed by the Base and Top Bracket pieces and fasten as shown.

   NOTE: In order to ensure all of the screw holes will line up easily, it is recommended to hand-tighten the nuts through the entire assembly process, and then fully tighten once all bolts have been inserted.

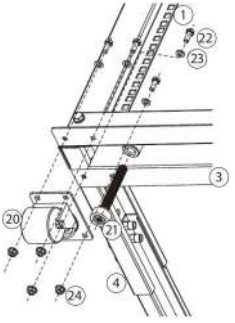

3. Using the remaining two Beams assembled in step 1, line up the other set of Left and Right Vertical Rails and fasten them to the Base and Top Brackets as shown.

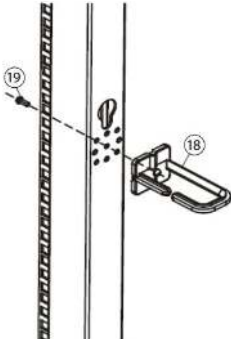

Optional Component Installation

1. Install the Casters (4pcs) and Leveling Feet (4pcs) as shown.

2. Stand the rack upright and install the included Cable Management Hooks in your desired locations as shown.

WARNING! Please ensure that the rack is fully assembled with all included parts and fasteners before attempting to mount any rack equipment. Failure to install and fully tighten any hardware could severely compromise the structural integrity of the rack. If any hardware is missing, please contact StarTech.com customer service immediately.
