How to Use Your Q10 Pro

01 Prepare Robot

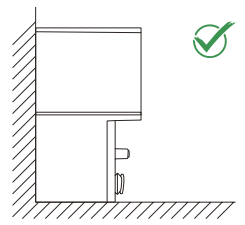

Place robot on flat surface, remove protective strips.

02 Attach Side Brush

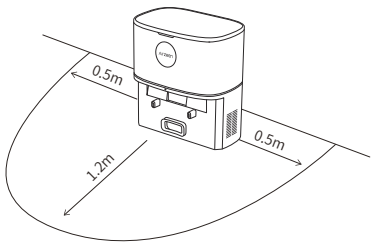

Push brush into slot until secure.

03 Position Charging Base

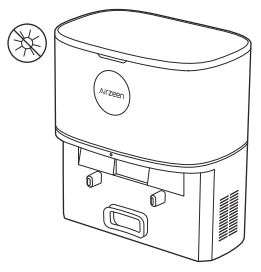

Place base on flat surface against wall, plug in.

04 Clear Charging Area

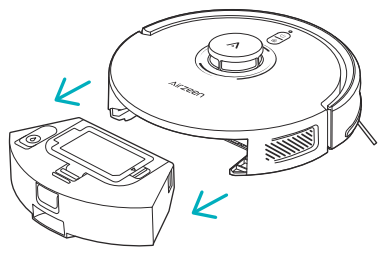

Place robot on flat surface, remove protective strips.

05 Avoid Sunlight

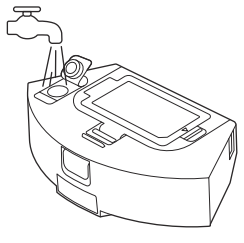

Don't move base, keep out of direct sunlight.

06 Remove Dustbin

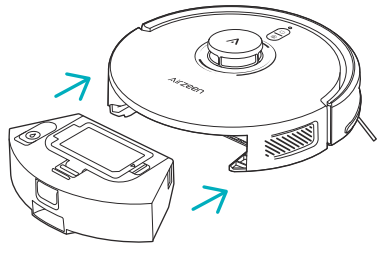

Press button, remove dustbin and water tank.

07 Fill Water Tank

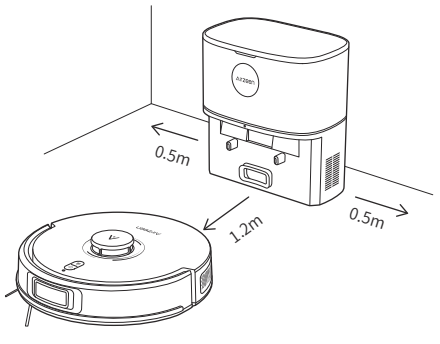

Fill tank with clean water, close inlet.

08 Attach Dustbin

Reinstall dustbin and mop bracket.

09 Power & Charge

Long press button to turn on, short press for auto-charge.

Note

1. Avoid placing the Clean Base on a carpet as this may affect its functionality.
2. The sunlight may interfere the recharging signal, which may cause the robot vacuum cleaner to fail to return to the charging base.
3. When using the 2-in-1 water tank for the first time, there may be a very small amount of water inside. This is normal and is a residue from production testing. Please use with confidence.
4. If the robot vacuum cleaner works for more than 1 minute and returns to the charging dock, it will automatically start dust collection to clean the dustbin.
5. If the battery power is insufficient, the robot vacuum cleaner may not be able to start. Please fully charge the robot vacuum cleaner first.

Connect to APP

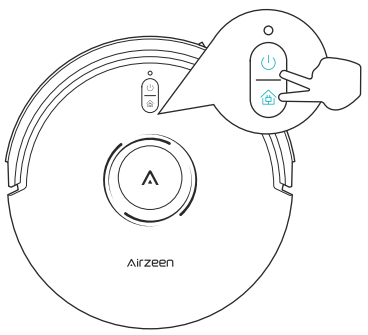

Scan the QR code to download our app and read the pairing tutorial.

You can also download the app by searching for "HomeAIoT" in the App Store and Google Play, but for detailed pairing instructions online, please the QR code.

To ensure network connection is successful, please turn on Wi-Fi and Bluetooth on your phone. Besides, please authorize the APP with "Nearby Devices" permission.

01 Reset to Network Configuration Mode

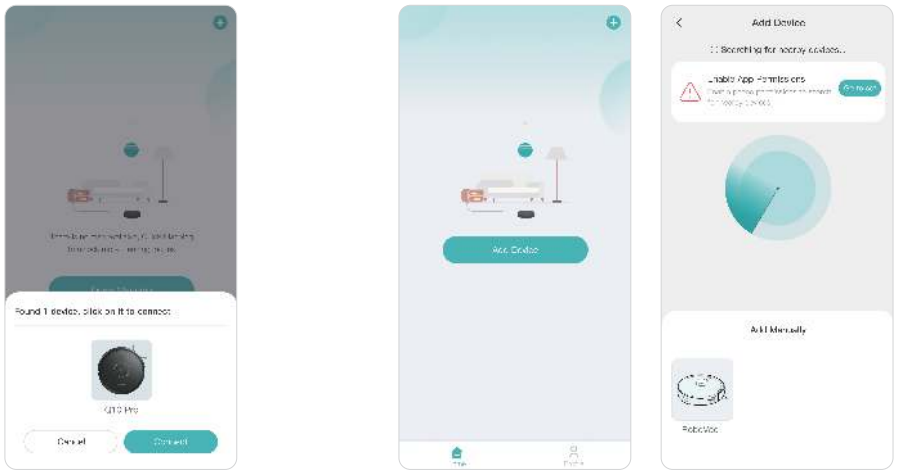

- With the device turned on, press and hold the two buttons for 5 seconds.
- Once you hear the voice prompt "Reset Wi-Fi, please follow the App instruction to pair", release the buttons. This will put the device into network configuration mode.

02 Discover Device and Initiate Connection

- Open the app on your phone.
- The app will automatically search for nearby devices.
- Tap the corresponding device you need to connect to the network.

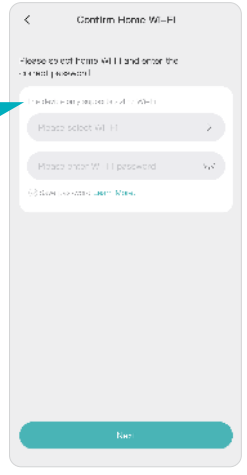

Note: If the device cannot be automatically discovered, please tap the "Add Device" or "⊕" button. When the app requests permissions, please tap "Go to set" and grant the permissions as prompted.

03 Select Wi-Fi Network and Input Password

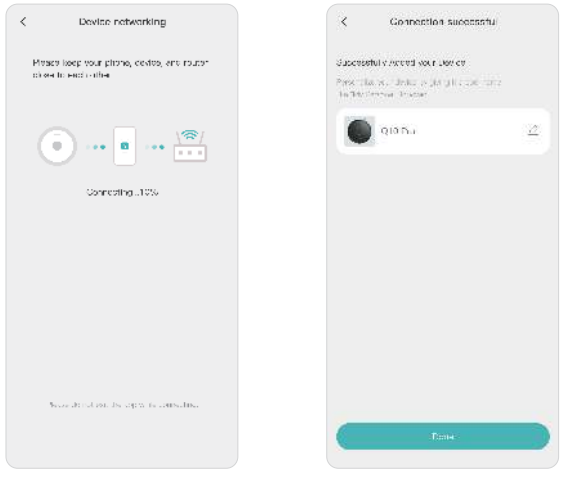

- Choose your home Wi-Fi network from the list.
- Enter your Wi-Fi password.
- Tap "Next".

Q10 Pro only supports 2.4GHz Wi-Fi network configuration and does not currently support 5GHz.

04 Complete Network Configuration

The device will now connect to your Wi-Fi network and complete the setup process.

Notes:

- Troubleshooting: If the setup fails, please reset the device and try again. **Alternatively, follow the in-app instructions to complete the setup using AP mode.**
- Permissions: Ensure that you have granted all necessary permissions to the app in your device settings. If the device cannot be found, check your device settings to verify that the app has the required permissions.
