HEXAGONAL CRIMPING: FOR ALUMINIUM AND COPPER

Hexagonal crimping is the most frequent type of crimping for cable lugs and connectors. Hexagonal crimping is one of the more traditional crimping profiles. It is most frequently used in practice, as it is suitable for both copper and aluminium conductors. With this crimping profile, the single strands and deformed over a large horizontal area.

Add: No. 198-208 Station Rd, Liushi, Wenzhou, 325604, China.
