AUTO PARTS QA

Sharing valuable products to those who need them

Q How to choose the right tire pessure sensor?

A Please enter your car model in the "ConfirmedFit" to confirm whether the sensor is suitable.

Q Does the TPMS sensors need to be programmed?

A The TPMS sensor are pre programmed, just activate them with scan tool.

Q What should I do before install the sensor on my car?

A Please scan the TPMS to make sure the tool can retrieve sensor information such as frequency, psi, battery status etc before install sensor on your car.

Q One of the 4 sensors I purchased would not connect or work properly, how to handle with it?

A Don't worry about that, our stuff will help you.

Q What should I do if I encounter problems during activation?

A First, you can c-ont-act us. Secondly, please change the activation tool. Use four mainstream activation tools: ATEQ, AUTEL, Launch, and CUB to solve this problem.
