How to Read Date Codes on Motor Nameplates & Labels

As of August 2006 a common date code format for all motors is being used. It consists of seven alpha-numeric characters. The first three characters represent the day of the year based on the Julian calendar, the next two the year, and the last two the plant code. For example, 123064M, would mean the 123rd day of 2006 (May 3, 2006) in Regal's Juarez IGMEX4 plant. Users and distributors may visit our website centuryelectricmotor.com to access our 'date code converter," as well as applicable warranty forms.

The date codes utilized prior to the conversion to our current format are listed below for your reference.
