2： Product Installation

Components for unpacking（Figure 1）

Assembly & Unfold（Figure 2）

STEP 1： The unpacked components are shown in Figure 1. All components have been assembled already except for the triangle wheel and shaft accessories；

STEP 2： As shown in Fig. 2, firstly, unfold the support rod, auxiliary wheels, and the loading frame, and then assemble the triangle wheels on both sides, and lock the external nuts. Finally, check the nuts at the other parts to ensure that they are locked tightly enough and complete the installation.
