Not the V519 Upgrade Tools

Step 3: Click DOWNLOAD

V519 UPGRADE AND PRINT TOOL

Software upgrade

1.After successful download, use Type-C data cable to connect the product and computer
2.Double click to run "V519ProductTool"
3.Select Update Firmware
4.Select "Start update" and wait until the upgrade is successful

Step 4: Extract "V519_Scanner_Update_Print_V10.ZIP" to Desktop.

Step 5: Double-click to run "V519 Scanner Update Print V1.0".

Step 6: Connect ZM201 and computer using Type-C Cable.

Step 7: Select review DTC/live datastream and print

About Upgrade: After downloading the software, just click on upgrade. Please note that disconnection during the upgrade process will cause the program to be lost and unable to work. If the car fails to start due to careless operation, please connect the vehicle and press and hold F1 when starting the vehicle to restore it to factory settings.

If the device cannot be restored, please email zmoonautoparts@outlook.com for a replacement or return.
