Compatibility Quick Check & Setup Guide

IMPORTANT: Check Your Device Compatibility First!
This SIM card works on US Networks. Your router MUST support US frequency bands

Incompatible Devices
If your device ONLY supports the following, it will **NOT** work:
International Bands: B1, B3, B7, B8, B20, B38, B40 (Only)
Warning: Many routers bought internationally or labeled "Global Version" may miss US bands B2/B4/B12.

Supported Bands

To ensure connection, your device specifications MUST include:

4G/LTE Bands: B2, B4, B5, B12, B14, B17, B25, B26, B30, and B66.

Router Setup: APN Settings is Required Most routers require manual APN setup.

Step 1: Log in to your router's admin page (usually 192.168.x.x).

Step 2: Find "Mobile Network" or "Internet Settings".

Step 3: Create a New Profile / Set APN:

APN Name: america.bics

Username: (Leave Empty)

Password: (Leave Empty)

Enable Data Roaming

Step 4: Save and Reboot the router.
