1. Product

DJI RS 2

2. Port

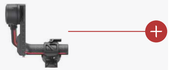

A Focus Motor Port
With two M4 screw holes, the Focus Motor Port allows the DJI Ronin Focus Motor to be fixed to the stabilizer.

B Tilt Motor
Mount the DJI R Roll Axis Counterweight Set here to adjust the roll axis.

C Tilt Axis Arm
The DJI R Vertical Camera Mount can replace the camera mounting plate on the tilt axis arm to enable vertical shooting in portrait mode.

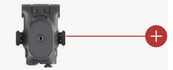

D Cold Shoe
A mechanical cold shoe that can mount the DJI Ronin RavenEye Image Transmis sion System and third-party accessories that have a cold shoe foot.

E RSA / NATO Port
Used to mount the DJI R Twist Grip Dual Handle and other compatible accessories, as well as communicate with 8-pin interface accessories. DJI also provides SDK for third-party accessories to control the stabilizer via this port.

F 1/4"-20 Screw Hole
Used to mount the DJI R Extended Grip/Tripod and third-party tripods or monopods with the same port.

G Electronic Ports
1. To connect camera shutter port and start/stop recording;
2. To mount the focus motor and control focus externally;
3. To power on and communicate with the DJI Ronin RavenEye Image Transmission System.

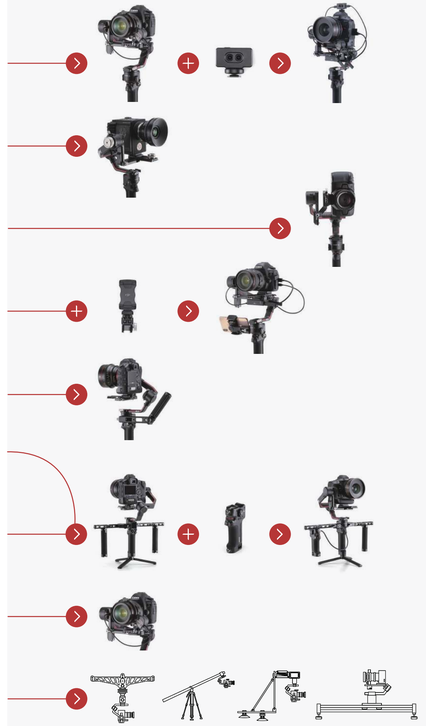

H Power Port
Dedicated port for DJI RS 2. Can connect to a standard battery grip or to an external battery via the DJI Ronin Expansion Base Kit.
