

The magnetic ring can be attached to any non-metallic surface
(e.g., phone cases, bedside tables, ID card holders.)

Note: Do not directly attach the adhesive side of the magnetic ring to the back of the reader. The reader has a built-in strong magnet, and all phone models must be used with the magnetic ring.

The illustration in this manual shows an iPhone 14 Pro Max phone case for demonstration purposes.

1
Logo side is the front

2
The side with the “3M” marking is the adhesive side

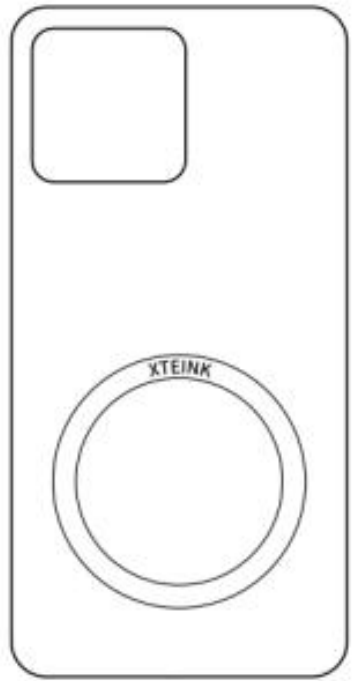

3
The magnetic ring’s magnetic side attaches to the back of the reader
(not the adhesive side)

4
Remove the adhesive backing

5
Stick the reader with the magnetic ring onto the back of the phone case.
(Note: Do not attach directly to the back of the phone.)

6
Remove the reader
